TIA is like a stroke, but it only lasts up to 24 hours. The supply of oxygen enriched blood is temporarily cut off to a part of the brain and restored after a while.

Synonyms

TIA, mini stroke.

Definition

Transient ischemic attack is a sudden focal loss of neurologic function with complete recovery (Psora) usually within 24 hours, caused by a short-term period of insufficient perfusion in a portion of the territory of the carotid or vertebral basilar arteries (Psora).

Signs and Symptoms

Transient ischemic attacks classically last for only a few minutes and most of the symptoms are vanished after an hour (Psora). It is possible to have a number of TIAs, each one having similar or varying symptoms.

Sudden paralysis, lack of sensation in the limbs or face, generally on one side of the body (Psora).

Sudden loss of sight in one or both eyes (Psora).

Difficulties in understanding speech and/or difficulty in speaking (Psora).

Trouble in swallowing (Psora).

Incoordination and imbalance (Psora/ Syphilis).

Dizziness (Psora).

Drooping of face to one side (Psora).

Drooping of an eye or the mouth (Psora).

Slurring of speech (Psora).

In some cases the person cannot keep their arms up in the air (Psora).

If there is long-term damage to the brain or the symptoms last for more than 24 hours, it is called as a stroke (Psora/ Syphilis).

Causes

Blood clot as a result of a blood condition (Psora/Syphilis) (e.g. sickle cell anaemia) or a heart condition (e.g. atrial fibrillation) (Psora/ Sycosis) etc.

Embolism (Psora/ Sycosis)

Atherosclerosis (Psora/ Sycosis)

Rarely transient ischemic attack has been caused by haemorrhage (Psora/ Pseudopsora).

Risk Factors

Family History of TIA.

Males are more prone to.

Aging.

Ethnicity - Certain races (African, South Asian and Caribbean) are more prone to diabetes and high blood pressure - both risk factors for mini stroke.

Overweight.

Physical inactiveness.

Poor diet with high fat, salt content and low in nutrients.

Drinking heavily.

Smoking.

Taking cocaine.

Hypertension.

CVD (cardiovascular disease).

Diabetes.

Peripheral artery disease.

Carotid artery disease.

Diagnosis

Neurological examination.

Blood tests - blood sugar levels, cholesterol levels and clotting ability.

Chest X-ray

CT scan

CTA (Computerized Tomography Angiography) scan

Echocardiogram

ECG (Electrocardiogram)

MRI

Ultrasound scan

Treatment

It depends on patient's age, medical history and the characteristics of some of the signs and symptoms.

Surgery - carotid endarterectomy.

Angioplasty

Regimen

Healthy body weight

Healthy balanced diet, including plenty of fruit and vegetables, and avoid too much fat and cholesterol

Don't smoke

Avoid heavy drinking

Control your diabetes

Exercise regularly

Avoid illegal drugs such as cocaine

Homoeopathic treatment

Top remedies for TIA in decreasing order

Pain - tearing, very severe, violent – paralytic carb-v. chin. Kali-c. Staph.
Pain - trembling and paralytic weakness, with kalm.
paralyses - functional, of all descriptions gels.
paralyses – professional gels.
Paralysis – agitans Agar. ant-t. Arg-n. bar-c. bufo con. Gels. hyos. kali-br. lil-t. lol. mag-p. mang. MERC. nux-v. phys. plb. rhus-t. stram. zinc.
paralysis – agitans ant-t. aur-s. gels. helo. hyos. hyosin. kali-br. lath. lol. lyc. phys. plb. tarent. zinc-cy. zinc-pic.
Paralysis - apoplexy, after Arn. Bell. cocc. lach. nux-v. phos. stann. zinc.
Paralysis – ascending ars. con. mang. ox-ac. phos. pic-ac. vip.
paralysis – ascending con. lyss. sulfon.
Paralysis - cold bathing amel caust. con.
Paralysis - coldness - icy - body of, with bar-m.
Paralysis - coldness – icy ars. dulc. graph. nux-v. Rhus-t.
Paralysis - coldness - of parts , with caust. cocc. dulc.
Paralysis - contraction of limbs, with ars. chen-a. olnd. sec. valer.
Paralysis - convulsions, then tarent-c.
Paralysis - cramps, after tab.
Paralysis – descending Bar-c. merc. zinc.
Paralysis – diphtheritic apis arg-n. caust. Cocc. diph. gels. lac-c. Lach. Rhus-t.
paralysis – diphtheritic phyt. plb.
Paralysis - emaciation, rapid, of part, with sec.
Paralysis - emotions, from gels. ign. lach. nat-m. stann. stram.
Paralysis - epilepsy, after cur. Hyos.
Paralysis - extensor, muscles, of alum. ars. cocc. crot-h. cur. Plb.
paralysis – facial Kali-chl.
Paralysis – flaccid plb.
Paralysis - flexor, muscles, of caust. mez. nat-m.
Paralysis - fornication, with cadm-s. phos. sec.
paralysis – genera I, of insane kali-br. Phos.
Paralysis - general, of insane cann-xyz. crot-h. phos. phys. stram.
Paralysis – gradual caust. syph.
Paralysis - haemorrhage, with plb.
paralysis - hands and arms, of thyroid.
Paralysis - heat, in paralyzed part, with alum. phos.
Paralysis - hyperaesthesia of well side plb.
Paralysis – hysterical arg-n. asaf. cham. cocc. Ign. nux-m. phos. plb. Tarent. valer.
Paralysis - infantile - dentition, during kali-p.
Paralysis - infantile - paresis, after olnd.
Paralysis – infantile bung-fa. calc. caust. gels. kali-p. lath. plb. vip.
Paralysis - infectious diseases, after caust.
Paralysis - internal, sense of Lyc. nat-m. phos.
paralysis – lead Sul-ac.
paralysis - left side, of cupr-ar. nit-ac.
Paralysis - limbs, of - one arm or one leg only both.
Paralysis - limbs, of - sensation, of - walking, while rhus-t.
Paralysis - limbs, of - sensation, of graph.
Paralysis - limbs, of agar. alum. bufo CAUST. COCC. nux-v. plb. rhus-t. ruta sec. Sil. sulph.
paralysis – local Phys.
Paralysis - localised, single parts, organs Ant-t. bar-c. bell. CAUST. dulc. gels. hyos. nux-v. Op. phos. puls. sec. sil. sulph.
Paralysis - moistness, with stann.
Paralysis - motion, disorderly, with merc.
Paralysis - muscles, isolated, of cupr.
paralysis – nervous hom-xyz.
Paralysis - pain – from nat-m.
Paralysis - pain – with cadm-s.

Paralysis – painless [cann-xyz](#). [Cocc. Con.](#) [gels.](#) [Hyos.](#) [Lyc.](#) [olnd.](#) [plb.](#) [RHUS-T](#).
