

# Puppy Care Guide

<b>Play and Rest:</b>	Treat your new puppy as you would a new born baby. We recommend that you make the first few days together as calm as possible. Remember this is a very traumatic time for a small puppy. They will play until they drop. They actually may play so much that they are too tired to eat, which is not good for them. Especially be aware of the amount of time children play with the puppy. Puppies like babies need rest time and naps.
<b>Feeding:</b>	Please feed your puppy premium grade puppy food. Please refer to the feeding guidelines on the food you purchase. <b>DO NOT ATTEMPT TO CHANGE FOODS</b> until the puppy is use to your home & New life about 3 to 4 weeks. Then if you do change food do it gradually.
<b>Monitoring:</b>	We recommend that you not leave your puppy alone for the first 24 Hours so that you can monitor his food and water intake this will combat any dehydration, always monitor food and water intake. Remember English Bulldogs are heat sensitive. Please don't leave them out in hot weather for an extended period of time.
<b>Shots and Worming:</b>	Do not forget to keep up with your puppy's shots puppies must have them all for protection. Your puppy should also be wormed continuously they do reoccur.
<b>Hair Care:</b>	If your schnauzer puppy has long hair please remember to keep his bottom shaved or trimmed. Sometimes the poo poo can get caught up in the hair and keep your puppy from being able to go potty. This can cause serious problems and even death.
