## Alerts by Date

## Who is Dedrone

- Over 250 successful installations
- Protecting 80 Global Prisons
- Securing 15 International Airports
- Protecting the **World Economic Forum** for the past 4 years

## Who is Dedrone

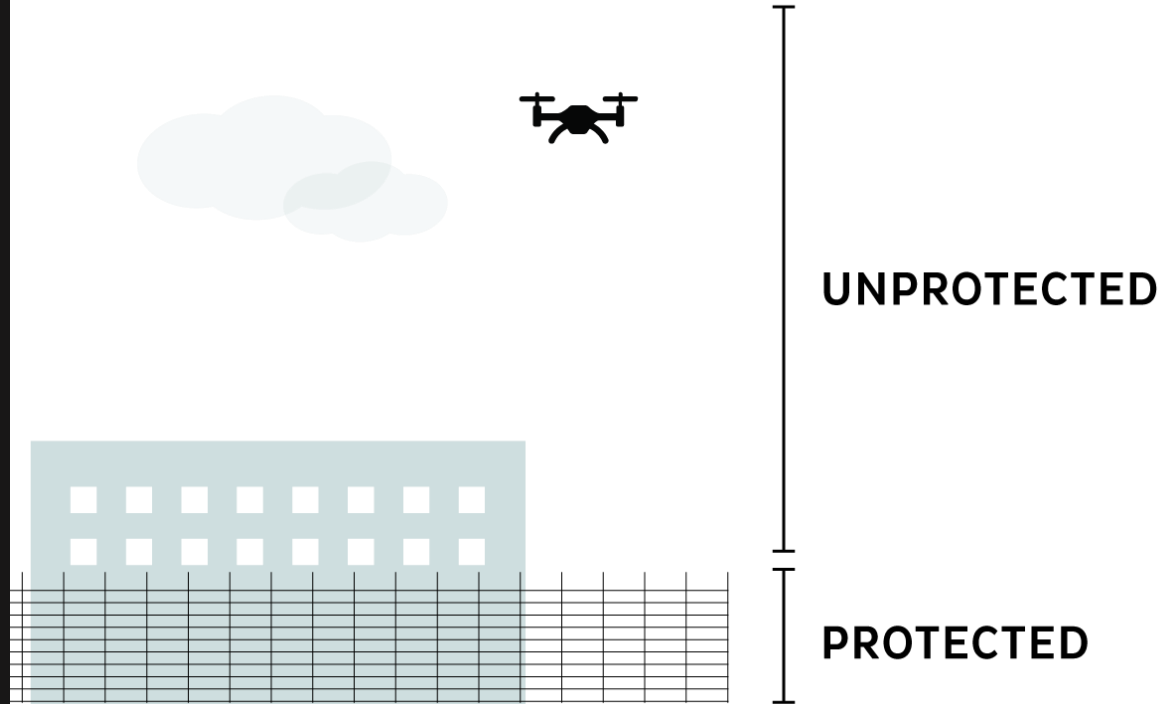

- The largest investment in Counter Drone Security Measures of over **\$43 million USD**
- **40+** Research and Development Engineers
- Average **130% growth** year over year
- Largest database of drones in the World

# Traditional Security is Helpless against Drones

Completely blind to airborne threats:

- Smuggling
- Spying
- Terror

## Malicious drones threaten business and society

Counter-  
measures

# Machine Learning Based Sensor Data Fusion

Processing events from all sensors, sensor fusion, localization, trigger alerting and automated countermeasures.

# Radio Frequency (RF) Sensors

DEDRONE'S OWN PRODUCTS

## RF-160: Detection and classification

- Fast, easy and relatively inexpensive way to start discovering drone activity within perimeter of POI
- Range up to 3.1 miles

**(5 Km)**

 Dedrone

# Early Warning Alerts

Alert sent via SMS or email as soon as remote or drone are detected

- Gives security teams extra time to react
- Keeps groups informed as required
- Additional notifications available through API

## 1 Threat Assessment

# Airspace Analytics Drive Security Decisions

- Understand patterns in drone activity
- Quickly uncover concerning airspace activity
- Stay up-to-date with critical information

## Dedrone RF-300

DEDRONE'S OWN PRODUCTS

### Main Functions in the Platform

- Localizes and tracks drone using three sensors
- Completely passive direction-finding
- Supplements RF-160 sensor
- Discreet form factor
- **1.6 Km range**

# Swarm Drone Detection with RF Sensors

## SCREENCAST

### Small deployment

 3 RF-300 / 1 RF-160

 3 Drones detected

(Video: Doublespeed)

Drone DJI Inspire

The screenshot displays the DroneTracker web interface. At the top, there is a navigation bar with 'HOME', 'ALERTS', 'REPORTS', 'OPTIONS', 'HELP', and 'admin'. A red 'ALERT' banner is visible. The main area is a radar view over a city map, showing three detected drones (yellow diamonds) and three RF sensor beams (blue lines) originating from a central point. A 'MONITORING' table on the left lists three detected drones. A 'DETAILS TARGET ID: 4' panel shows drone information. A 'SENSORS' table at the bottom lists active sensors.

MONITORING				3 ALERTS

# Pan-Tilt-Zoom (PTZ) camera

3RD PARTY PRODUCT

## Benefits

- Optical verification
- Visual auto-tracking
- Determines the flight altitude
- Discovers autonomous drones
- Identifying of payloads
- Significantly reduces radar false alarms
- In combination with RF Sensors drones can be classified
- Range up to 12 miles

Dedrones open software platform allows the implementation of any kind of sensors, regardless of the manufacturer.

# Radar

---

3RD PARTY PRODUCT

---

## Benefits

- Detects up to 512 threats simultaneously
- Determines the flight altitude
- Discovers autonomous drones
- Range up to 6 miles
- In combination with a PTZ camera false alarms are significantly reduced
- In combination with RF Sensors drones can be classified

---

Drone verification and alarm only in combination with a second device.

---

Counter-  
measures

# Mitigating Drone Threats

## Defensive Measure

- Track drone in real-time
- Trace flight back to pilot
- Inform security staff
- Block view, lock down areas
- Record video evidence

# Jammer

---

## DEDRONE'S PRODUCT

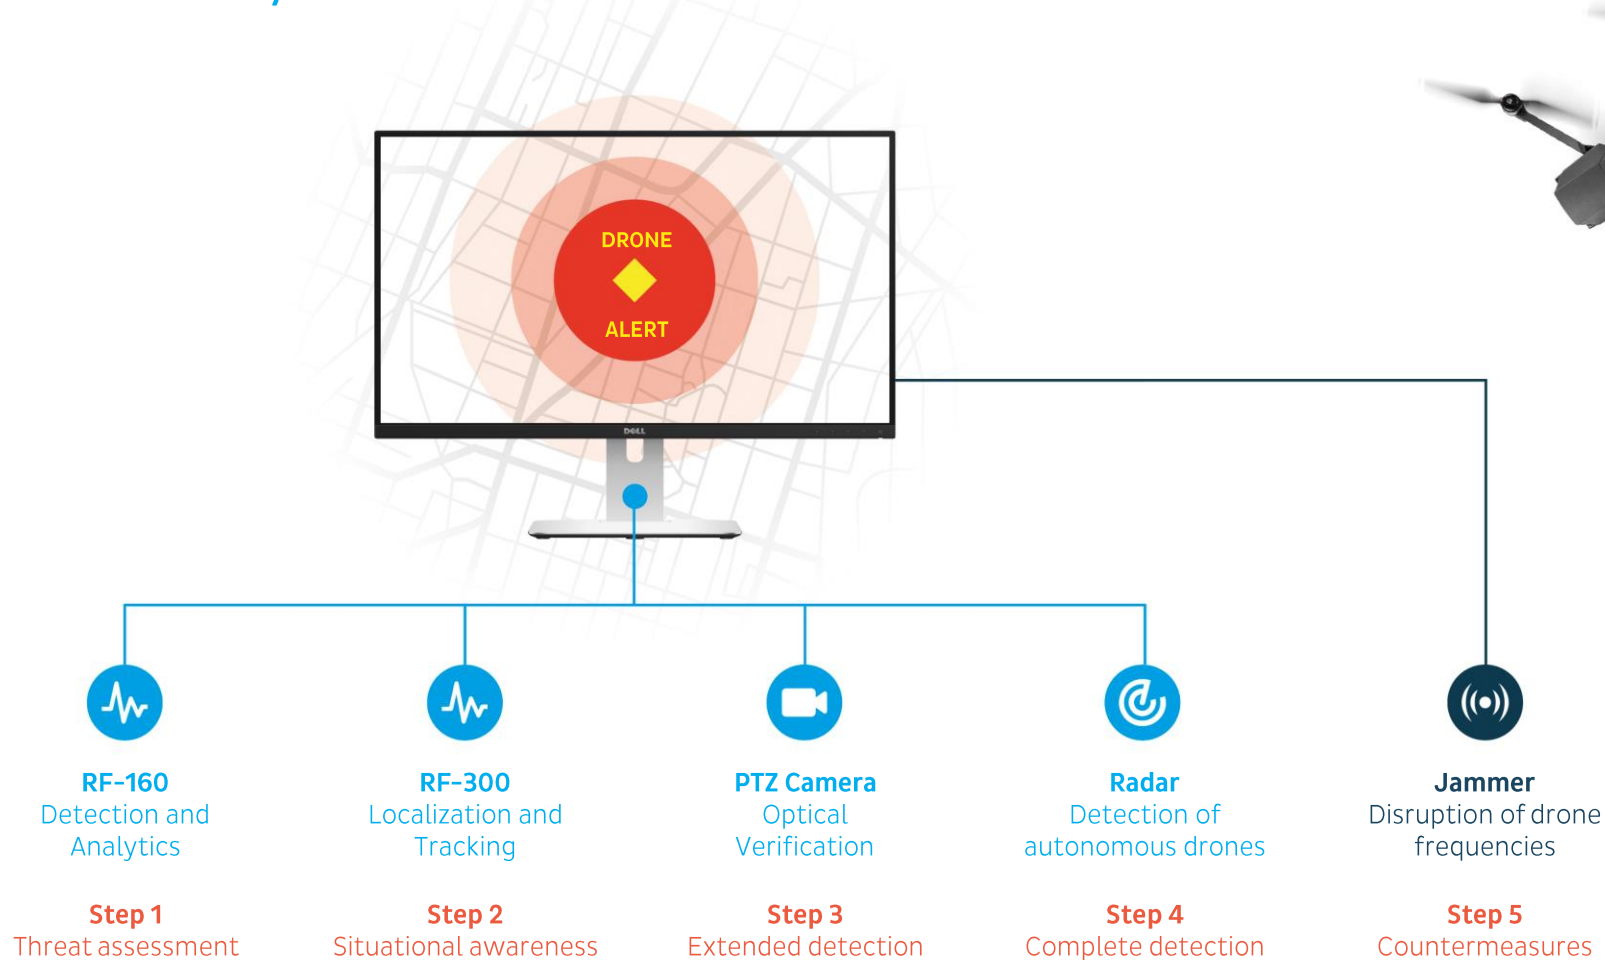

---

### **DroneDefender: Benefits**

- Multifrequency disruption to block remote control communication and neutralize drones. No remote action, including detonation, can occur.
- Satellite signal disruption to disable use of automated navigation
- Mobile and fixed installations
- Range up to 400 meters

# Overall Summary - Multi-Sensor Platform

# Nuclear plant

## Case Study

Sensors installed

**3 RF-300 + 1 RF-100**

Monitored from Dedrone Ops

**24/7**

Initial contract annually

**\$210k**

Future proof due to

**Open platform**

No active sensors or signals

**100% passive**

# Airport

## Case Study

Sensors installed

**16 RF-300 + 3 RF-100**

Monitored from Dedrone Ops

**24/7**

Fully autonomous

**No operator needed**

Future proof due to

**Open platform**

No active sensors or signals

**100% passive**

Only power and poles

**Does not need IT**

Thank you
