Integrity

Ownership with Honest Passion

Trust

Promise

"To bring the best innovation and professionalism to every detail we deliver."

Our Solutions

Counter UAV (Anti-Drone)

Persistent Surveillance Systems for Indoor and Outdoor Areas

Military and Enterprise Drones

Command and Control Rooms

Shooting Ranges

Our Partners

Founded in 2014, Autel Robotics has always strived to let the needs of its customers drive innovation. They are a team of industry professionals with a genuine passion for technology and years of engineering experience. Their deep commitment in key core-technology research, their strive for excellence, and their goal to surpass customer expectations allows their team to set new benchmarks for drone technology and performance for commercial and consumer users alike. They work tirelessly with their partners to provide the best aerial solutions, with tangible, everlasting value for their customers. In 2015, Autel Robotics released its first-generation UAV product: the X-STAR. The success of the X-STAR and the subsequent EVO series allowed Autel Robotics to quickly build a reputation in US markets. With the introduction of the EVO II series and platform in 2020, Autel Robotics will push its folding UAV to new heights in performance and application.

Skyfend is a leading innovator in counter-unmanned aerial systems (C-UAS) technology. The company develops and manufactures advanced solutions that safeguard military, government, critical infrastructure, and enterprise environments against the evolving threats posed by drones. Leveraging expertise in electronic warfare, artificial intelligence, and multi-sensor integration, Skyfend provides reliable detection, identification, and neutralization capabilities. Their solutions are trusted worldwide to deliver fast, scalable, and field-proven protection in complex operational environments.

Our Partners

IHSE is a leading developer and manufacturer of advanced KVM devices.

Since the last 35 years, IHSE has been a leading developer and manufacturer of advanced KVM devices in global demand. KVM stands for Keyboard, Video, Mouse. KVM technology allows the switching, extension, and conversion of these three primary computer signals and many else, e.g., DVI, HDMI, digital audio, or USB. At their headquarters near Lake Constance, Germany, IHSE develops and manufactures switches for operating and switching between computers and consoles, as well as extenders for visually lossless signal transmission, with 30 years of experience

Mission: DroneShield delivers AI-powered, multi-mission solutions that ensure decisive advantages against the threats of unmanned systems.

DroneShield is an Australian publicly listed company providing C-UAS (counterdrone) protection, focusing on Radio Frequency sensing, Artificial Intelligence and Machine Learning, Sensor Fusion, Electronic Warfare, Rapid Prototyping and MIL-SPEC manufacturing. Our capabilities are used to protect Military, Government, Law Enforcement, Critical Infrastructure, Commercial and VIPs throughout the world. Through our team of engineers, we offer customers bespoke solutions and off-the-shelf products designed to suit a variety of terrestrial, maritime or airborne platforms.

Our Partners

NERTHLAB

Nerthlab is a forward-thinking drone technology company dedicated to developing next-generation aerial platforms for both commercial and defense applications. With a strong focus on innovation and engineering excellence, Nerthlab designs and manufactures drones that combine endurance, adaptability, and high-performance capabilities. Their systems are optimized for applications such as surveillance, mapping, inspection, and tactical missions. By merging advanced hardware with intelligent software, Nerthlab empowers industries and governments with cutting-edge unmanned solutions that redefine operational efficiency.
