Telecommunications

IHSE is a leading developer and manufacturer of advanced KVM devices.

IHSE is a leading developer and manufacturer of advanced KVM devices in global demand. KVM stands for Keyboard, Video, Mouse. KVM technology allows the switching, extension and conversion of these three primary computer signals and many else, e.g. DVI, HDMI, digital audio or USB. At their headquarters near Lake Constance, Germany, IHSE develops and manufactures switches for operating and switching between computers and consoles, as well as extenders for visually lossless signal transmission, with 30 years of experience.

Riedel Communications, founded in 1987, designs, manufactures and distributes innovative real-time networks for video, audio and communications. Its products are used for broadcast, pro-audio, event, sports, theatre and security applications worldwide. The company is known for pioneering digital audio matrix systems and fiber-based real-time network technology. Riedel is headquartered in Wuppertal, Germany and employs over 600 people in 20 locations throughout Europe, Australia, Asia and the Americas.
