

Batavia Projects

CAPABILITY STATEMENT

ABOUT BATAVIA PROJECTS

Batavia Projects is an international development project consultancy.

We provide project management advice and executive decision making tools for complex urban and development projects.

Batavia Projects team delivers a corporate interface between project management decision making and client business objectives.

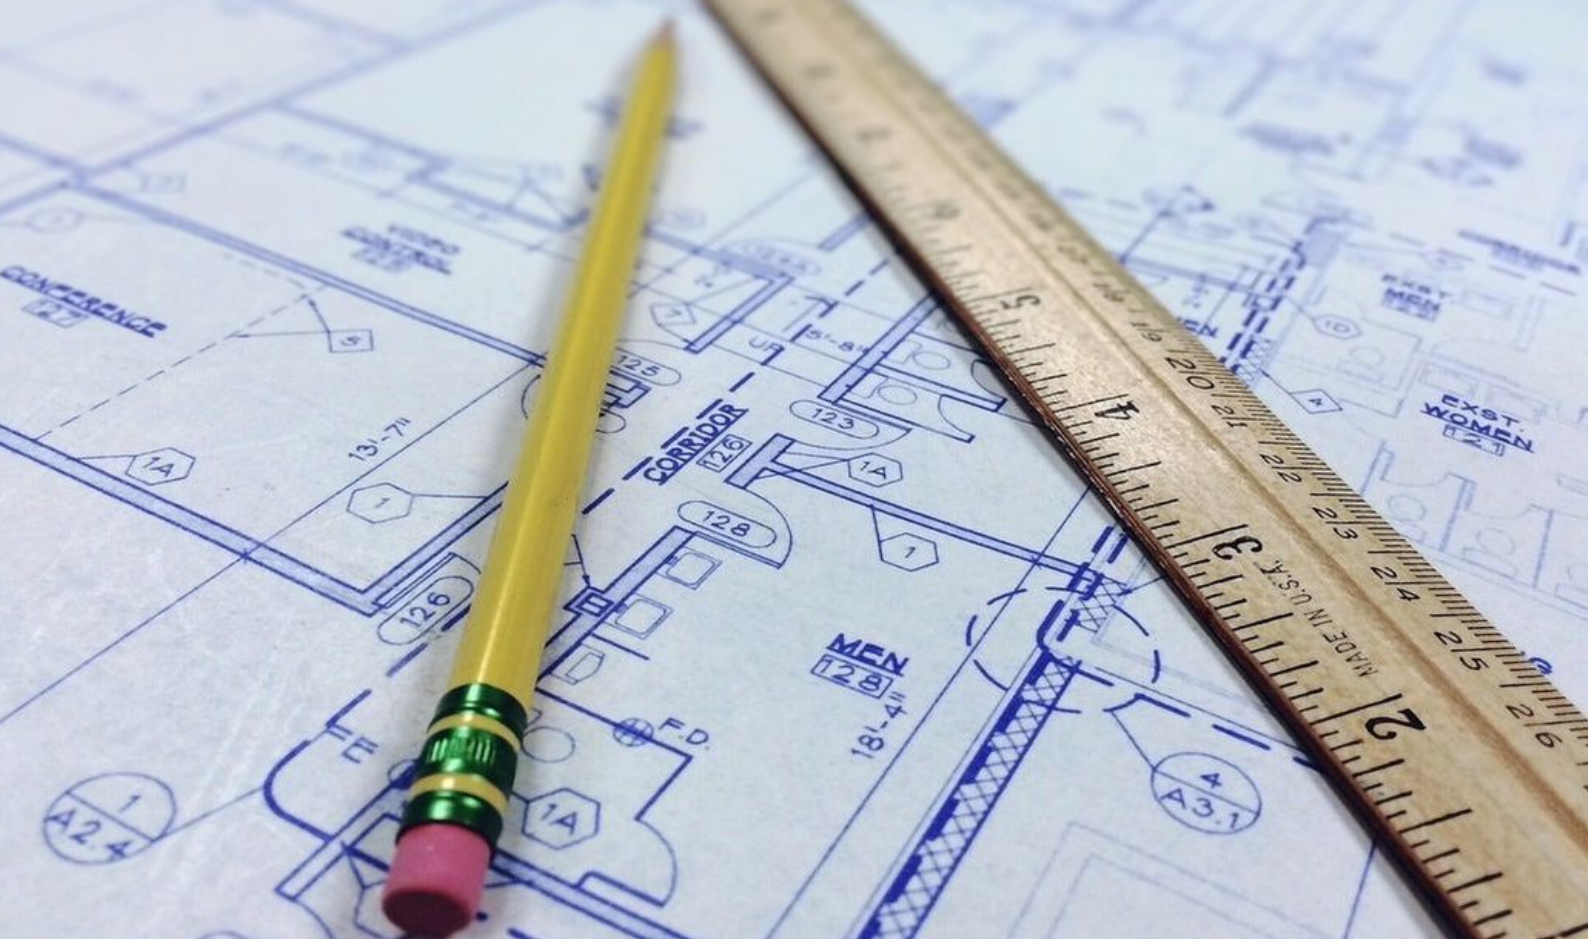

Batavia Projects complements corporate businesses with a range of skills, resource availability or capability and market knowledge to fully access and deliver complex projects.

We offer risk and management services for construction, project and program management tasks covering the entire project lifecycle.

Our project management team is resourced with highly experienced, international professionals offering diverse and high level capabilities.

Batavia Projects will deliver, contribute, and add real value to our clients' business objectives.

Our experienced and fresh thinking approach, together with our willingness to go the extra mile, will ensure clients receive solutions to their required delivery outcomes

With the experience to lead complex project teams, from initiation to completion, and the ability to interact and negotiate with stakeholders at all levels, our international project team offers our clients assurance of outcomes.

We have well established and long-term working relationships with government, consultants and construction contractors.

Our project delivery record demonstrates our understanding of complex stakeholder strategies and team integration required to generate outstanding results.

Our international team operates at all levels, defining and working in multi-faceted roles and providing leadership throughout the project process, from concept and business case development through to delivery and verification.

Working as part of a broader integrated team, we drive and support client capability uplift throughout the project life cycle.

Driven to deliver the best outcome, utilising our experience, tenacity and technical expertise, we preempt, mitigate and resolve risks and disputes that could jeopardise project delivery.

Our comprehensive contract management knowledge smooths project delivery through due diligence, strategic procurement, tailored tender and contract documentation, contract administration and commercial management services.

OUR LIFECYCLE APPROACH

OUR EXPERTISE

Our project management delivers projects to cost and schedule.

We achieve results and secure client's investment returns.

Our international team is highly experienced in project delivery models, implementation, controls/processes and stakeholder management.

Strategic Project Analysis

We provide upfront project analysis such as urban development planning, project feasibility reporting, and independent project review/verification services.

Program and change management

We lead and deliver complex programs. We guide property and infrastructure solutions, leveraging technology and process to facilitate organisational change.

Construction management

Our experienced professionals provide effective leadership, sharp attention to detail and a valued partnership you can count on throughout the project construction life cycle.

Strategic procurement

We implement effective strategies, vet suppliers and help establish supplier relationships to drive commercial outcomes, performance and quality.

Contract management

Our team has contract management knowledge covering strategic procurement, tailored tender and contract documentation, contract administration and commercial management services across the construction, real estate, corporate and professional services industries.

Engineering and design management

Our project and construction experience coupled with our technical backup capabilities ensures we bridge the gap between design and constructability throughout the construction and commissioning phases of projects.

Project governance

We advise on and deliver project governance to support the relationships between all groups involved in a project, describe the project information flow to all stakeholders and ensure reviews and approvals at all stages of the project.

Stakeholder and community engagement

Proactive stakeholder and community engagement form an integral part of every project. We are specialist and experienced stakeholder and community engagement professionals.

Delivery strategy

Developing a robust and bankable project delivery strategy can significantly affect the success of a large construction or infrastructure project.

Appropriate project delivery strategies and controls from concept and feasibility, to project completion are vital component of successful

OUR TEAM

Peter van Gent

Project Director – Australia, SE Asia, Africa

Peter has over 30 years experience in managing complex urban and built form project.

Managing multiple stakeholders and statutory approval processes is both an artform and skill set which Peter has delivered with award winning results.

Peter's achievements in managing the interconnectedness of complex projects range from feasibility studies, built form construction, streetscape and civil engineering, applying and integrating smart urban technologies, writing town planning schemes and delivering land subdivision to point of sale.

Peter adds value to projects through his awareness of appropriate project structures and controls, project feasibilities, communications, socio-political realities and the need to define and meet client expectations in delivering project solutions.
