DOGFIGHT COLLECTION

Dogfight is not an engagement.  
It is a state of alignment.

Operational analysis confirms: without total synchronization between pilot and aircraft, a dogfight cannot occur. Skill alone is insufficient. Hardware alone is inert. Effectiveness is achieved only when both operate as a single system.

The Dogfight Collection was developed under this principle.

#### PHASE I - AIRFRAME EXPRESSION

Designation: STRIKER

Inspiration source: F/A-18 platform.

Attributes observed: speed, precision, dominance.

Per protocol, each aircraft bears the name of its commanding officer.  
Call sign assigned: CAPT HAVOC.

Definition of Havoc (internal):

Not disorder.

Not chaos.

Controlled force applied at the exact moment it alters outcome.

#### PHASE II - PILOT INTERFACE

Equipment derived from G-suit performance requirements.

Materials selected to manage pressure, load, and endurance.

Applications deployed across carry systems and accessories.

Purpose: stability under stress.

No excess.

No distraction.

Conclusion:

Dogfight is achieved only when operator and machine function in unison. When intent, control, and execution align, performance becomes inevitable.

Further details remain classified.
