

SKY ODYSSEYS LLC

SBA Certified Service-Disabled Veteran-Owned Small Business (SDVOSB)

Mission Operations • Aerospace Consulting • Specialized Flight Systems

COMPANY OVERVIEW

Sky Odysseys LLC is an SBA Certified Service-Disabled Veteran-Owned Small Business (SDVOSB) providing mission operations, aerospace consulting, and specialized flight solutions to government, commercial, and research organizations.

Our expertise combines real-time satellite mission operations, operational planning, aerospace systems, and specialized flight capabilities to support technically demanding missions. We help customers execute complex operations through disciplined planning, technical problem solving, and mission-focused execution.

CORE COMPETENCIES

Mission Operations

- Satellite Mission Operations
- Telemetry, Tracking & Command (TT&C)
- Real-Time Mission Support
- Mission Planning & Execution
- Operational Procedure Development
- Anomaly Response & Operational Decision Support

Aerospace Consulting

- Aerospace Operations Consulting
- Mission Systems Integration
- Flight Operations Planning
- Payload Mission Planning
- Technical Documentation
- Operational Process Improvement

Specialized Flight Solutions

- Lighter-Than-Air Flight Operations
- Airborne Payload Support

- Flight Test Support
 - Sensor & Payload Evaluation
 - Custom Mission Development
-

DIFFERENTIATORS

- SBA Certified Service-Disabled Veteran-Owned Small Business (SDVOSB)
 - Experience supporting mission-critical aerospace operations
 - Expertise spanning space operations, aviation, and mission execution
 - Agile, responsive support tailored to customer requirements
 - Practical operational experience in safety-critical environments
 - Innovative, cost-effective approaches to specialized airborne missions
-

TARGET CUSTOMERS

- Department of Defense
 - Federal Civil Agencies
 - Prime Contractors
 - Commercial Space Companies
 - Research Institutions
 - Universities
 - Emerging Aerospace Companies
-

FUTURE CAPABILITIES

Sky Odysseys is expanding specialized airborne mission capabilities to support payload testing, atmospheric research, communications experimentation, and other customer-specific aerospace applications. We welcome opportunities to collaborate on innovative flight concepts and mission development.
