# Access to Water Project – Palma

## Objective:

- Improve access to potable water to communities in Palma – Sede (Palma District) District

## Phase 1 activities (Completed):

- Repair of existing water tower and public fountains and associated pipelines to serve approximately 20.000 people of Quilawa and Barabarrane

## Phase 2 Interventions (On-going)

- Extension of the water distribution system to complement the phase 1 intervention
- Construction of 3 fountains in the central/commercial area of Palma – Headquarters
- Construction of 30 boreholes (new)
- Repair of 20 Boreholes(old)
- Repair of 4 Boreholes (solar base)
- Repair of two water towers and drilling of 1 borehole to supply water to the Palma District Health Center
