

BASIS SCOTTSDALE GAZETTE

This Meal Schedule is the Zest by Ran Cao

Welcome to BASIS Scottsdale, the school that has the best school lunch in the whole Milky Way! All of the dishes we serve come from some of the world’s top chefs and the most highly-rated restaurants. Let us dig in and take a look at the best lunch schedule that ever existed.

On Mondays, we have sushi shipped across the sea. These nice round rice balls layered with mayonnaise sauce, fruits, and different varieties of meats are delicately wrapped in seaweed. They have been quite a talk in other schools!

On Tuesdays, we have salads specially made for those on a diet. The biggest difference in our salads is the cheese. There is a small bag on the stand full of cheese you can add. You could dump the whole bag onto your salad, and the staff would simply take out more bags! The cheese is always something you could look up to.

On Wednesdays, we have fresh-baked pizza delivered by a private jet from Italy overnight. The pizza has the softest crust you ever tasted and is splattered with the perfect amount of sauce. “This is the only meal I look forward to because it’s absolutely amazing!”. The pizza is filled with rich ice cream that is made from Grade-A Milk of the top three dairy products industry.

On Thursdays, there are hot steamy plates of tuna sided with vegetables that were freshly picked the day before. The staff gives you the perfect amount of healthy vegetables and as much tuna as you desire! The tuna were also caught the day before in a stream up in Flagstaff. Don’t worry if the stream is polluted because it is a government-qualified territory protected from pollution.

On Friday mornings, the hot dogs are delivered at around 9 A.M., so they are fresh from the nearby restaurant. The special thing about our hot dogs is that you can choose the toppings yourself! Whether with no sauce or with pickles, you could follow whatever your heart desires and have the best lunch ever!

Isn’t this lip-smacking deliciousness? Well, what about the price? Luckily, it’s only 2.99 bucks per meal! Ain’t that cheap? Welcome to the Basis MPR, the world’s cheapest, tastiest meals with the most heart-warming staff you’ll ever meet!

Paper towel dispensers outside bathrooms? What an innovative placement! BASIS Scottsdale is at the forefront of educational innovation, serving as a model for all BASIS Charter Schools. Our administration strives to facilitate the livelihoods of all BASIS students. I mean, why would you ever need paper towel dispensers inside bathrooms when you can simply walk a little further to grab them? You're getting exercise and forming puddles of water on the floor—definitely not a safety hazard!

BASIS Scottsdale has yet to apply various other alterations within our school environment. The administration's decisions are completely rational and always taken under thorough consideration. Here are some of the board's latest proposals to improve our school:

Eradicating Clocks:

Who needed them in the first place? Do students really need to know when class ends? Clocks are distracting to our learning environment. As a student myself, I remember constantly counting the seconds that pass by until class is over. Time doesn't dismiss you. The teacher does, so there's no need for these devices at all.

Trash Bins by the Entrance:

These bins should only be placed at the front of our school entrance. Not only does it encourage exercise but also promotes sustainability. Students now have to rethink twice before grabbing a tissue or throwing away an old homework assignment. Their trash load will pile up throughout the day and show them the severity of their impact on our beautiful planet.

CONTINUED FROM PAGE 3

Backward-facing Desks:

Throughout BASIS history, desks have traditionally been positioned to face the whiteboards. However, our administration has developed a novel method to harness both students' mental and physical exertion—backward-facing desks. By having desks face away from the whiteboards, students must regularly turn their necks around to learn content, enhancing both their neck muscles and mental fortitude to endure the neck pain.

As always, these proposals are the culmination of months of faculty meetings and input from the students themselves. BASIS Scottsdale isn't your typical school. It's the pioneer in shaping the future of our nation's academic learning. If students have any suggestions, please feel free to contact the administration! However, any criticism will not be considered.

Bulletin Boards in Bathrooms:

The crowded BASIS hallways prevent students from having the opportunity to read the news posted on the bulletin boards. Having them moved to the bathrooms provides an undisturbed environment for students to take in all the presented information. In addition, students who camp out in the bathroom to pass the time will now have something to read!

Frenemies Forever

by Payton Dymek

As a BASIS Scottsdale student I've grown up with the classic Scottsdale-Chandler rivalry, and I think we can ruin circles around BASIS Chandler any day of the week and twice on Sundays.

Extracurriculars Everywhere

by Dana Nam

As many of us know, BASIS is known for its large selection of clubs and extracurriculars. While public schools might have clubs like tabletop gaming, engineering club, and choir, or sports teams like swimming and lacrosse, at BASIS we have to stay in a room for about an hour and talk about the great elements of math and education.

Public schools might have more fun extracurriculars, but our clubs tackle the more important things in life such as how to file taxes and what the best equation in physics is. These are the types of skills that will get you into college and surely can help you in life for years to come. Public schools fail to see that students come to learn at school and that fun activities do not provide the kind of “learning environment” that BASIS clubs do.

INCOMPLETE ARTICLE

HOROSCOPE

By: Neha the Precognitive and her Loyal Scribe, Andrew

Aries (March 21st - April 19th): This month is a fountain of prosperity. Make sure you drink wisely.

Taurus (April 20th - May 20th): Catch a breeze outside. It's good to get some vitamin D.

Gemini (May 21st - June 21st): You will realize your interests in an unexpected manner.

Cancer (June 22nd - June 22nd): Beware of infringements to your freedom.

Leo (July 23rd - Aug. 22nd): Don't be in a rush to end your current chapter. Sometimes the next one is even worse.

Virgo (Aug. 23rd - Sept. 22nd): Abundance will rapidly enter your life. It will just as rapidly exit.

Libra (Sept. 23rd - Oct. 23rd): Do not hesitate to reach out. Most of the people around you have the best intentions.

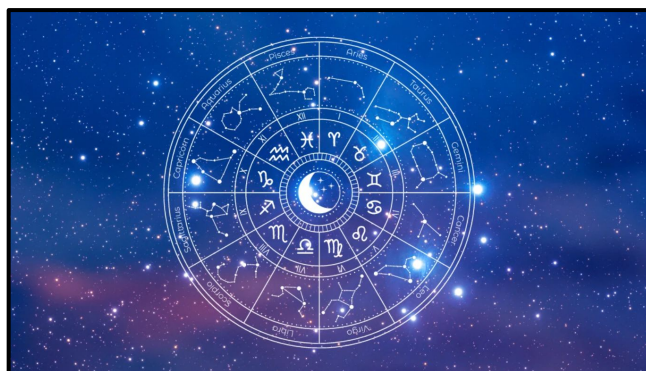

Scorpio (Oct. 24th - Nov. 21st): Look behind your shoulder. Enemies surround.

Sagittarius (Nov. 22nd - Dec. 21st): We only have so many attempts in the experiment of life.

Capricorn: (Dec. 22nd - Jan. 19): Try confronting a new fear this month! Y.O.L.O.

Aquarius (Jan. 20th - Feb. 18th): You will receive some profound and thorough insight into the wild happenings of the life of someone close to you.

Pisces (Feb. 19th - March 20th): Be Careful driving on the bumpy road that awaits.
