

Basic care tips for your cabinets:

- Please allow the paint 30 days to fully cure.
- Wipe up spills, splatters and water spots as they occur. Keep cabinets dry.
- Clean as needed with a soft, lint-free cloth. Use mild detergent or soap and warm water. Dry surfaces immediately with a soft cloth.
- Avoid using a dishcloth or sponge, which could contain remnants of grease or detergents. Do not use products with bleach, ammonia or abrasive additives.
- Never use scouring pads, steel wool or powdered cleaners. Do not allow oven cleaners to come in contact with cabinets.
- Avoid placing small kitchen appliances (like coffee maker, rice cooker, etc) where heat is directed onto cabinet surfaces.
- Avoid draping damp clothes or dish towels over cabinet doors. Excessive moisture can cause permanent damage.
- Avoid hitting cabinets with vacuum or mop, this can cause damage to the cabinets.
