INTELLIGENT LIGHTING MADE SIMPLE

aeroslight.co.uk

MYTH

DIGITALLY CONTROLLABLE
BEAM, COLOUR AND OUTPUT

aeroslight.co.uk

A blurred black and white photograph of an art gallery. In the foreground, a person is walking from left to right, looking at a large abstract painting on the wall. In the background, several other people are standing and looking at art. The gallery has white walls, a polished floor, and track lighting on the ceiling.

The flexibility of Myth is second to none

Beam and output control, alongside colour tuning make this a great product giving clients the ultimate choice

MYTH

DIGITALLY CONTROLLABLE BEAM, COLOUR & OUTPUT

MYTH

Digitally controllable beam, colour and output

DIGITAL BEAM CONTROL

A digitally controlled, surface mounted track spot with fully integral driver and controls in 2 sizes MINI & MIDI. Myth delivers 1000 or 2000 lumens respectively, at around 100 lumens per Watt.

Myth has outstanding flexibility with digital beam (from 10 to 50 degree) colour and output control via Casambi wireless or Dali control, with a range of colour options from Tuneable White, to RGBW, or just single colour.

MYTH

Digitally controllable beam, colour and output

SLEEK & CLEAN DESIGN

Myth is a super sleek, fully integrated luminaire with a powder coated finish in white or black. As a track spot, Myth can be simply mounted onto a 3 circuit mains track, low voltage track, or simply a surface mounted connection box.

A broad range of accessories can also be added including long snoot, honeycomb louvre, wash wash ring and barn doors

MICRO

The MICRO will deliver super high power, from really micro luminaires, providing 600 lumens at over 100 lumens per Watt . Its compact size package means it can be designed into some really sleek luminaires.

PRODUCTS COMPATIBLE

To Follow 2025

MINI

The MINI delivers 1000 lumens at over 100 lumens per Watt . Its compact size package means it can be designed into some super sleek luminaires, and by using the Genius+ MINI module, digital beam control becomes a reality, with onboard Casambi or Dali wireless control.

PRODUCTS COMPATIBLE

MYTH – Digital Track Spot
PURE – Digital Pendant
EVO – Digital Downlight*

MIDI

The MIDI delivers 2000 lumens at over 100 lumens per Watt . Its compact size package means it can be designed into some super sleek luminaires, and by using the Genius+ MIDI module, digital beam control becomes a reality, with onboard Casambi or Dali wireless control.

PRODUCTS COMPATIBLE

MYTH – Digital Track Spot
PURE – Digital Pendant
EVO – Digital Downlight*

MAXI

MAXI is all about output and light quality, delivering 3000 lumens at over 100 lumens per Watt . Its compact size package means it can be designed into some super sleek luminaires, and by using the Genius+ MAXII module, digital beam control becomes a reality, with onboard Casambi or Dali wireless control.

PRODUCTS COMPATIBLE

MYTH – Digital Track Spot*

EVO – Digital Downlight*

MYTH

Digitally controllable beam, colour and output

BROAD APPLICATION

The product is designed for application into museums, high end hospitality and retail, allowing designers the option to create schemes with incredible flexibility.

From all day dining, to museum exhibitions everything can be catered for, from high 98 CRI, to candle whiskey scene candle warmth, it can be delivered by Myth Genius.

MYTH

Choice of High CRI Light Modules

GENIUS – full digital control via Casambi or Dali, controlling beam, output and colour

Genius + provides 3 great choices - 5000K to 2200K for broad flexibility and 3000K to 1800K for high end hospitality and residential application. Finally there is a RGBW colour change option with an excellent 2700K warm white, all of which are at 90 CRI or more... For near perfect colour rendering applications, Genius X offers 98+ CRI 5000K to 2700K tuneable and with digital beam choice.

AIR – full digital control via Casambi or Dali, controlling beam, output and colour

Fixed beam with digital output and tuneable white colour control (or static colour)
Air provides all static colour and tuneable white with a range of fixed beam angles, all at either 90 or 98+ CRI

aeros Modules – High efficacy, high colour rendering with digital beam control

Air ⁺

The **highest efficiency** module based around the Bridgelux Thrive, delivering over 120 lumens per Watt at 90 CRI. Choices of static white; a range of beams from 15-50, and dimming control via Dali, Casambi or other options.

- 3 Size options for 1000, 2000, & 3000 delivered lumens
- High efficacy at over 120 lumens per watt
- Single colour options with choice of whites 27, 30 & 40K
- Fully dimmable via dali, 0-10, triac or with the option of remote mounted wireless Casambi control
- Choice of fixed beam from 15-50°

Air ^x

Incredible CRI at 98 CRI based around the Bridgelux F90, delivering over 100 lumens per Watt. Choices of static white; a range of beams from 15-50, & dimming control via Dali Casambi, or other options.

- 3 Size options for 800, 1500, & 2500 delivered lumens
- Super high efficacy at over 150 lumens per watt
- Single colour options with choice of whites.
- Fully dimmable via dali, 0-10, triac or with the option of remote mounted wireless Casambi control
- Choice of fixed beam from 15-50°

Genius

A **static white 90 CRI digitally controllable module with beam & output control** via Casambi or Dali control. Static whites can be dimmed and beam angles can still be changed digitally, make the Genius module the simplest of the family at 90 CRI

- 3 Size options for 800, 1500, and 2500 delivered lumens
- 90 CRI minimum colour rendering
- Integral Digital beam, output and colour change options via Casambi or Dali.
- Single colour choice of white
- High efficacy, over 100 lumens per Watt delivered
- Choice of beam from option ; 15-45° or 10-50°

Genius⁺

A **digitally controllable 90 CRI module with beam, output and colour change** via Casambi or Dali control. Tuneable white, static white, or RGBW colour changing options deliver excellent flexibility, making this the ultimate digitally controlled light module

- 3 Size options for 800, 1500, and 2500 delivered lumens
- 90 CRI minimum colour rendering
- Integral Digital beam, output and colour change options via Casambi or Dali.
- Tuneable white, RGBW, and single colour white options
- High efficacy, over 100 lumens per Watt delivered
- Choice of beam from option ; 15-45° or 10-50°

Genius^x

A **digitally controllable 96 CRI module with beam, output and colour change** via Casambi or Dali control. Tuneable white, static white, or RGBW colour changing options deliver excellent flexibility.

- 3 Size options for 800, 1500, and 2500 delivered lumens
- Integral Digital beam, output and colour change options via Casambi or Dali.
- Greater than 96 CRI for incredible colour rendering
- Tuneable white, RGBW, and single colour white options
- High efficacy, over 100 lumens per Watt delivered
- Choice of beam from option ; 15-45° or 10-50°

MYTH MINI

PRODUCT SPECIFICATION CODES

MYTH MINI PRELIMINARY DIGITAL TRACKSPOT - DATASHEET

Overview

Myth is a digitally controlled, surface mounted track spot with fully integral driver and controls. MYTH MINI delivers over 1000 lumens at over 100 lumens per Watt and has outstanding flexibility with digital beam, colour and output control via Casambi wireless or Dali control, with a range of colour options from Tuneable White, to RGBW, or just single colour.

The product is designed for application into museums, high end hospitality and retail, allowing designers the option to create schemes with incredible flexibility. From all day dining, to museum exhibitions everything can be catered for, from high 98 CRI, to candle whiskey scene candle warmth, it can be delivered by the Myth family.

Features

- Minimalist fully integrated Trackspot with multiple control options including casambi Digital Beam change technology with Genius light module.
- Delivering over 1000 lumens at over 100 Lumens per Watt.
- Extra high CRI option at 98+ CRI.
- Part of the Myth trackspot family with higher and lower output options.

Options

- Choice of aeros Light module with high efficiency, high CRI or ultra high CRI performance.
- Low voltage track option with remote digital control.
- Choice of static colour, tuneable white or RGBW.
- Choice of control options, including Casambi, Dali and Phase.
- Range of beam angles 15,24,36,50 or digital beam change 10-50 or 15-35
- Black, white and RAL paint finish options.
