Mouse

MOUSE

- This is a pointing device which contains a roller in its base.
- When the mouse is moved on any surface, the pointer on the screen is also moved.
- It contains a potentiometer coupled with the roller.
- This potentiometer senses the motion of mouse & convert it into digital value.
- A mouse may contain two or three buttons.

What is the Mouse?

The mouse is an input device designed to manipulate objects on the computer screen and assist you, the user, in interacting with the computer.
