

Ingredients

- 2.5 cups water
- 1 1/4 c. salt
- 1 1/2 tbsp. cream of tartar
- 5 tbsp. vegetable oil
- 2.5 cups flour
- Sax Concentrated Liquid Watercolors

Steps

1. Mix everything but the liquid watercolors together in a large pot until somewhat smooth. It will be lumpy. Not to worry, the dough will get smoother as it cooks.
2. Cook the dough over a low heat. Mix frequently. The water will slowly cook out of the mixture and you'll notice it starts to take on a sticky dough appearance. Keep mixing until the edges of the dough along the side and bottom of the pan appear dry. Pinch a piece of dough. If it's not goeey, the dough is ready.
3. Place the dough on a counter top or large cutting board that can withstand a little food coloring.
4. Knead the warm dough until it's smooth and then divide it into the number of colors that you'd like to make. I divided mine into four balls, flattened each of them, added a little bit of liquid watercolors, and then kneaded it in. Keep adding liquid watercolors and kneading until it turns the deep color you want.

Play with the dough right away or store it in a large Ziploc bag or sealed container.
