

5 WAYS TO MAKE YOUR CAT HAPPY

Animal Behaviour Kent

1

HIGH PLACES

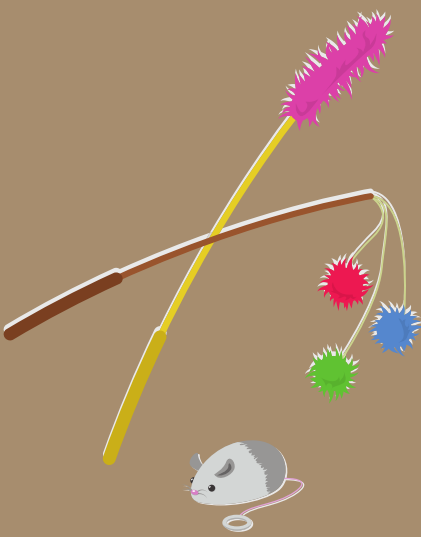

As prey animals, cats have evolved to feel safe in high places. Cat trees, tables, and ledges are great for this.

2

TOYS

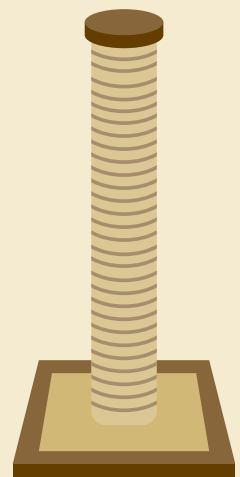

Cats love toys. They are a great way for them to express their hunting instincts and get some exercise. Make sure you let them win sometimes to keep them motivated.

3

SCRATCHING POSTS

Scratching posts are a great way for cats to mark their territory, and shed their claws (while saving your furniture).

4

HIDING PLACES

Cats love small hiding places. Cardboard boxes and cat beds both work great. The more choices they have, the better.

5

TRIPS TO THE VET

Give your cat the opportunity to spend time in their carrier, and hide some nice food in there to make it seem like a nice place. This will help your cat feel more safe when they do go to the vets.
