CERTIFIED TESTING & WEIGHING

LiftPRO was instrumental in the development of computerized lifting software used across the U. S.

LiftPRO's PORTABLE load cells -

5,000 lb.; 250,000 lb.; 300,000 lb.; 600,000 lb.

provide "on-site" weighting and testing for overhead, Jib, and construction cranes as well as load-weight verification.

LiftPRO's 300,000 lb. Test Bed:

- Load Testing & Weighing
for Overhead, Jib, Construction Cranes
- Load-Weight Verification
- Certify/Re-certify Sling Inventories
- Certified Load Testing & Weighing
- Proof & Break Testing

Computerized Testing -

To ASTM E4 certification, traceable to National Institute of Standards & Technology. Testing determines the load limits to within + or - 1%.

LARGE INVENTORY

LiftPRO maintains a vast inventory of raw materials to quickly respond to your lifting needs

- **Nylon and Polyester** - We stock 1" to 12" flat web and are one of a very few manufacturers stocking this depth of flat web material

International, Inc.

"Lifting Products for Professionals"

Providing lifting products to North America, South America and the World.

"Mid-America's Gateway to the World," the Port of Duluth, Minnesota, calls upon LiftPRO to supply lifting devices used in the handling of cargo.

Pictured below - The unloading of wind turbine blades as well as fourteen 20-foot containers and three 40-foot containers of parts for the wind turbines. Trucks pulling extended flat bed trailers continued the transportation of the blades, all 66 of them, to their final destination.
