PODO SUMMER CAMP for G1-G3

Offering exciting opportunities to create, explore, and learn

Students in our 3 weeks program will experience four different sessions from June 3rd through August 23rd. They will be inspired by engaging lessons that will prepare them for the upcoming school year, all while having fun: Keep your child's mind and body active during the summer break with provoking classes that build upon and promote the use of the essential skills that help ignite life-long learning. Whether it be coding, literature, art, or sports, Podo Summer Camp will offer something for everyone.

SCRATCH is a graphical programming language, developed by the MIT. Students can drag and combine code blocks to make a range of programs, including animations, stories, musical instruments and games. It's a bit like the programming equivalent of LEGO!

TIME	Monday - Thursday	Friday
9:00-9:30	Think Like an Engineer: Building and Design
