# Marketing & Sales

I just got off the phone with a salesperson selling a contact's database . He showed me some cool features like who hits my website and all their contact information and who is looking for training from Google. They have all the college information and people in all industries that I want to reach. They use AI in the process of doing business. Their automation would take care of that. I was impressed by their system.

We will also do an SEO on the website to increase hits and business.  This may happen by the end of June 2025.  This will increase both our AI Course Sales and AI Consulting Business.  We signed up several AI development companies to handle our consulting division.

**Sources for us to market our courses:**

| | |
|---|---|
| Podcasts & Press Releases | Magazine Articles |
| Email Decision Makers | Image Ads |
| Contacting Colleges | Facebook |
| Contacting Corporations | Individuals |

## Cancer Research Summary

The device we will use for cancer research has the ability with our code to be able to find cancer earlier.

It can help doctors practice their surgeries as well as using it in the operating room to find cancer and remove it.

It saves the doctors the stress of looking up to a monitor and using it as a way of seeing what to do. This device will revolutionize the way cancer will be found by also using it to read CT Scans, MIR's and X-rays.

# Financials for AI Online Developer +

## Financial Summary

## Sales for 2026:

| | |
|---|---|
| College Purchases | $ 300,000.00 |
| Corporate Purchases | $ 10,000,000.00 |
| Individual Purchases | $ 200,000.00 |
| Consulting Business 2025 | $10,000,000.00 |
| AI Medical Projects | $20,000,000.00 |
| **Total Sales** | **$40,500,000.00** |

Our medical AI projects will be completed by 2026. We expect to license our code with the device for finding cancer starting in 2026.

We plan to hire 2 salespeople to sell to Corporations and colleges. Plus, we will save money by purchasing a database Zoominfo

Our competition is the big corporations that are providing courses to our competition selling on their own. Our AI Engineering programs should be our big seller. As well as the Machine Learning Engineering.
