"Learn Tomorrow's Technology Today with Artificial Intelligence"

_____

AI Online Developer Plus Inc. (referred to from hereon in as the Company) was established as an S Corporation with the expectation of rapid expansion in the technical online training industry. The Company solicits financial backing to be able to introduce its new service (described below). Website **aiondevplus.com**.

Development of Courses

Data Science has the core courses for the Data Scientist and Data Analyst. We have the core courses ready. The Data Scientist and Data Analyst are in the process of being updated. Data Science job openings are projected to be 11.5 million for 2025 and 2026.

We will be introducing our Machine Learning Engineering course. Designing a Machine Learning (ML) course involves balancing theoretical concepts with practical applications. Below is an outline for a comprehensive ML course, including modules, subject matter, and key topics. This course is designed for individuals with a basic understanding of programming and math, and it progresses from foundational to advanced topics.

AI Online Developer +
Professional Artificial Intelligence Packages

ASPECT	AI ENGINEER	ML ENGINEER	DATA SCIENTIST	DATA ANALYST
Primary Focus	Designing and deploying AI models and systems	Implementing and optimizing ML algorithms	Analyzing data to extract insights and build models	Analyzing and interpreting data
Key Responsibilities	Developing AI-based solutions, integrating AI into applications	Building and deploying ML models, feature engineering	Data cleaning, modeling, and visualization	Data cleaning, reporting, and visualization
Skills Required	Deep learning, natural language processing (NLP), computer vision	Supervised and unsupervised learning, optimization	Statistical analysis, programming, data visualization	SQL, data visualization, basic statistical analysis
Programming Languages	Python, R, Java, C++	Python, R, Java, Scala	Python, R, SQL	SQL, Excel, Python, R
Tools and Libraries	TensorFlow, PyTorch, Keras	TensorFlow, Scikit-Learn, PyTorch	Pandas, NumPy, Scikit-Learn, TensorFlow	Excel, Tableau, Power BI, Pandas
Educational Background	Computer Science, Electrical Engineering, AI-specific programs	Computer Science, Engineering, Mathematics	Data Science, Statistics, Computer Science	Statistics, Business, Economics
Common Job Titles	AI Engineer, AI Developer	ML Engineer, ML Developer	Data Scientist, Research Scientist	Data Analyst, Business Analyst
Typical Employers	Tech companies, AI startups, research labs	Tech companies, finance, healthcare	Tech companies, research institutions, finance	Corporations across various industries
Career Path	AI Researcher, AI Architect	Senior ML Engineer, Data Science Manager	Senior Data Scientist, Data Science Director	Senior Data Analyst, Business Intelligence Analyst
Salary Range	$90,000 – $150,000+	$80,000 – $140,000+	$80,000 – $130,000+	$60,000 – $100,000+
Industry Demand	High	High	Very High	High

evolution of technology. This can make it difficult to keep up with the latest advancements and maintain a competitive edge. Failure to stay up to date with industry trends and innovation could lead to your product becoming outdated and losing market share. Our consulting firm will answer this risk by staying ahead of technology.

Business Mission

The business mission of AI Online Developer + Inc. is to become a leading provider of technical training for both technical and non-technical on a global scale. Specifically, the company aims to offer courses in Artificial Intelligence and Software Testing, two fields that have seen tremendous growth in recent years and are projected to continue to do so. To achieve its mission, AI Online Developer + Inc. would need to establish a strong brand and reputation for quality training programs that are relevant to the current and future needs of the industry. OpenAI.com is an essential tool in training in several areas of Data Science, including Artificial Intelligence and Machine Learning. As a cutting-edge AI research organization, OpenAI provides valuable resources such as software libraries, pre-trained models, and research papers that can assist in the teaching of AI Data Science courses.

According to the US Bureau of Labor Statistics, the employment of computer and information research scientists, which includes data scientists, is projected to grow 15% from 2019 to 2029, much faster than the average for all occupations. In addition, LinkedIn's 2021 Emerging Jobs Report identified data scientists as the third most in demand job in the United States, with a 46% year-over-year growth rate in hiring. The demand for data science workers is not limited to the United States; it is a global phenomenon. In fact, a report from the World Economic Forum predicted that by 2025, there will be a global shortage of 85 million skilled workers, including data scientists, in the fields of data analysis, artificial intelligence, and machine learning.

Mark Kembel: A Visionary Leader in AI and Educational Technology

Mark Kembel is a pioneering entrepreneur and seasoned technology expert whose career bridges the worlds of artificial intelligence and education. With a passion for innovation and a dedication to democratizing complex technologies, Mark has built a reputation as a forward-thinking leader driving real-world impact in the EdTech and AI spaces.

Today, Mark is the founder and CEO of **AI Online Developer Plus, Inc.**, a cutting-edge platform offering practical, industry-relevant training in artificial intelligence, data science, and software development as well as leading a technology consulting firm that is a leader in Medical AI. The company provides a diverse portfolio of courses, including programs for AI Engineers, Machine Learning Engineers, Data Analysts, and AI Program Managers. Designed with real-world applications in mind, these programs focus on hands-on learning and practical implementation.

Mark's instructional philosophy emphasizes accessibility. Recognizing that many learners struggle with the theoretical complexity of AI, he has built courses that simplify learning

through concrete examples and step-by-step project guides. By integrating tools like OpenAI and user-friendly platforms such as Microsoft Excel for data visualization, he ensures that even those without advanced math backgrounds can grasp foundational AI concepts.

With a career rooted in innovation, Mark Kembel continues to inspire a new generation of learners and technologists, proving that with the right guidance, anyone can harness the power of AI. Visit https://aiondevplus.com/ to get more information on Mark's AI Programs.

Funding Request Option

The Company will sell 1,000,000 preferred shares for $10.00 per share, a total of $10,000,000.00, to be used for the following purposes listed in the marketing section. There is no limit to how many shares one person can buy. The company reserves the right to purchase stock first before outsiders buy the stock. The company also gets the right to transfer stock to its books if the stockholder wishes to sell. If the stockholder dies the transfer of stock will go to the beneficiaries. The stock must be held for at least two years. All stock to be purchased in U.S. dollars from foreign investors. Minimum investment $2,500.00 or 250 preferred shares.

To get financial projections for sales just email us. But here's the more exhilarating part: I invite you to be part of our journey. We're opening an opportunity for $10 Million in funding. These funds will be meticulously allocated to amplify our outreach (advertising), hire an elite sales force, and onboard a seasoned Marketing Manager who'd helm the ship with their expertise and vision. Other financing avenues are also on the table, and we're flexible in discussions.

Business Description

The Company was formed 0n 04/15/2019 as S Corporation under state laws and headed by Mark Kembel. We became a **C Corporation** on 01/07/2021 with the IRS. Mark worked six years at Microsoft as a Software Test Engineer and Test Lead and Seven years as the CEO of interTest.com Inc., a technical training company. Over six years CEO of Online Developer + Inc. Performed marketing, sales, and management in both training companies. AI Online Developer + is an online training platform that provides courses for both technical and non-technical people.

Company Structure

AI Engineering Courses – To deliver online Artificial Intelligence training

AI Consulting – Provide development services from our development partners to corporations.

AI Medical – Provide medical material and service Top Peak Capital to give help in recruiting medical partners.

A.I. will not replace you, someone using A.I. will.

AI Online Developer + is an online training platform that provides courses in various fields, including data science. Online training platforms like AI Online Developer + have become increasingly popular in recent years due to their flexibility, accessibility, and affordability. Students can learn at their own pace and on their own schedule, without having to attend a physical classroom or adhere to a rigid curriculum. The purpose of a stock offering for an online training platform like AI Online Developer + could be to raise funds for expansion or to invest in new technology and resources to enhance the quality of their courses. This could include hiring more experienced instructors, developing new and relevant course content, improving the platform's user interface, or expanding their reach to new markets.

Risk for company

As a startup AI software company, there are some risks that could impact the success of your business. One major risk is the fast-paced nature of industry and the constant change in the course materials. We will maintain a partnership with development companies to update course materials.

Change in medical research and competitors' beating our clients with the final product. New partners will keep us updated in technology. We are always searching for new partners.
