

Today is the day I launched “Global Surgical AI Healthcare. Everything is being done to bring the company to the market.

- Search for a CEO that has a background as a Surgical RN to work in several medical assignments and FDA Trials.
- My background in AI will allow me the knowledge to hire the right Developers, work with the hospitals with technical issues and run the company as the Chairman of the Board. Also hire more Board members with medical backgrounds.
- Work on raising the \$10 Million eventually for the company to stay the leader in the Global Surgical AI Healthcare area.
- Next update the Website once we get some of the money from the Stock Offering.

Investor Information is available on request. Email markkembel@gmail.com

Global Surgical AI Healthcare is a division of AI Online Developer +
