How to Apply

1. Cut off the tab guide (located to the right) by cutting along the dotted line .

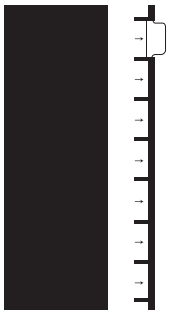

2. Once tab guide is detached, align the top of the tab guide flush with the top of your Bible page. Once tab guide is in place, mark a line on the tab guide that represents the bottom of your Bible page.

3. Cut the tab guide horizontally at the mark you just made, making the tab guide the same length as your Bible page.

4. Once tab guide is the same length as your Bible page, place the tab guide flush with the top of your Bible page. The right side of the tab guide should be 1/4 inch away from the edge of your Bible page

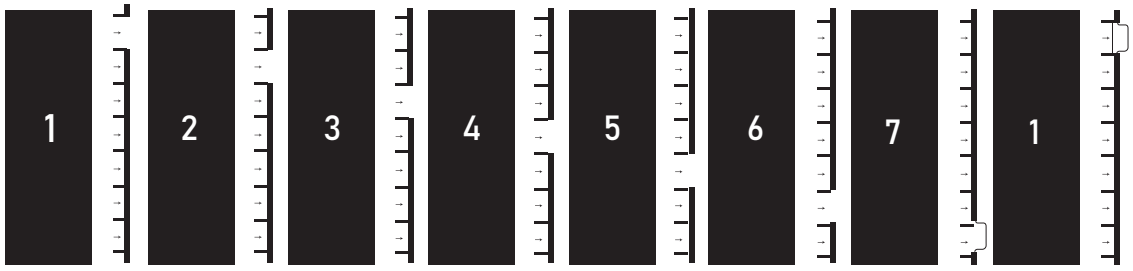

5. Select the appropriate Bible tab sticker and align it with the appropriate position following the tab guide lines

6. Press the tab gently into place on your Bible page. Ensure the tab is in the correct place like the diagram above.

7. Make sure you have one Bible page, fold the tab in half into place on the page.

8. Position the rest of your Bible tabs in your Bible and repeat steps 4-6. Once you have positioned a tab at the bottom of your Bible page, the entire pattern will repeat and the next tab will be at the top of the page. See the diagram below

Tips
-When placing the Bible tabs in your Bible, place all Bible tabs on either the right or left side of your Bible pages for a uniform look
-When folding the Bible tabs onto the pages, make sure they are even before securing into place
-When opening your Bible at a tab, always place your thumb or finger on the top of the tab and flip the Bible apen. Pulling or lifting the tab may tear the delicate pages
