

Shoreline Committee Report – February/March 2020  
(Submitted 4/2/2020)

During the months of February & March, the Shoreline Committee investigated a total of 7 new shoreline permit applications that were turned in by property owners who were planning to do work along their shorelines.

After meeting with the property owners and performing an on-site review of the property and the proposed planned activities of their projects, the Shoreline Committee approved a total of 4 shoreline work permits out of the 7 shoreline applications that were submitted. There are currently 3 shoreline permit applications that are waiting for additional information to be submitted by the property owner before a final review of these projects is completed.

Respectfully Submitted,

Dave Barker  
GLA Shoreline Committee Chairperson
