

GLA Weed/Algae/Sediment Control Committee Report
(January 27th , 2019 GLA Board Meeting)

A combined Weed/Algae/Sediment Control and Fish Committee Meeting was held on 1/8/20. The purpose of this meeting was to review the contract proposals that we were to receive from Rollins Aquatic Solutions, McCloud Aquatics, and JadEco Consulting & Management Services. Each of these Lake Management Companies were sent “Request For Proposals” for performing weed/algae/sediment control for the 2020 season on our lakes.

Just a few days (1/6/20) prior to the meeting on 1/8/20, we received an e-mail from JadEco Consulting & Management Services stating that they have decided not to participate in providing us with a proposal due to time constraints associated with our contract requirements.

Upon careful review of the proposals received from both Rollins Aquatic Solutions and McCloud Aquatics, it was a unanimous decision by the committee members present to recommend to the GLA Board of Directors that we once again contract with Rollins Aquatic Solutions for providing weed/algae/sediment control to our Goose, Beaver, and Lincoln Lakes at a cost which was over 7% lower than going with McCloud Aquatics.

Within this 2020 contract, Rollins will provide unlimited algae treatments, spot treatments for problematic submerged vegetation to a total of 41 acres, and 8.5 acres for sediment control at a total contract cost of \$33,934. This compares to the 2019 contract for unlimited algae treatments, spot treatments for problematic submerged vegetation to 39 acres, and 5.3 acres for sediment control at a cost of \$32,305.

Respectfully Submitted,

Joe Turk
Weed/Algae/Sediment Control Committee Chairperson
