“SPECIALIZING IN FRAMING”

The Arthur, framed
by Sully & Sons

CONGRATULATIONS PALUMBO PROPERTIES ON BEING CHOSEN “BUILDER OF THE MONTH.”

FOR MORE THAN 40 years, Bob Sully’s passion for distinctive framing has made Sully & Sons the choice for builders, architects and designers on some of the most unique homes up and down the east coast. Bob graduated from North Bennet Industrial School located in the North End of Boston. Years of experience have brought the company to the point of being recognized in New England as one of the area’s top framing companies.

Specializing in framing, Bob and his crew of skilled framers arrive at 6:30 a.m. ready to put in a full day’s work. They are well-known for their dependability and timeliness.

The crew now includes Bob’s two sons, Robert Jr. and Matthew, who are just as passionate as their father about house framing, and Bob’s daughter Jannelle, who also helps run the family-owned business by scheduling jobs and bookkeeping. Robert Jr. and Matthew graduated from Medford Vocational Tech, both taking carpentry classes all four years, but their experience did not

start there. Bob began teaching and mentoring his two sons at young ages. They would spend school summer vacations working alongside their dad. Robert Jr. now has 15 years of experience, and Matthew has eight years of experience, both working in the field.

President and founder Bob Sully believes that accepting the most challenging projects is what distinguishes Sully & Sons from the rest.

“I would say that almost every project we get into is either too difficult or too intricate for a lot of other framing contractors,” Bob says. “We make it a point to do what others won’t or can’t.”

The company owns and operates two cranes, one lull, and 10 nailing guns on every project. In addition to having modern equipment, they also have a structural engineer who works directly with the company and is on call 24 hours a day.

Their experienced crew allows them to be quick, on time and efficient. The company once framed a 26-foot-by-30-foot garrison in 10 and a half hours. ■

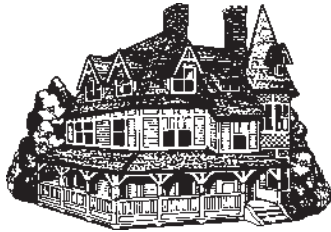

- » We are neat.
- » We do not waste time.
- » We do not cut corners.
- » We do not waste lumber.
- » We complete our work with cuts like finish work.
- » We make dormers and walls ahead of time and boom up with a crane.
- » We work in many difficult situations with contractors and architects.

“We enjoy a challenge and your satisfaction is our reward.”
