The 1745 Leduc Guarneri del Gesù is a glorious creation of Annibale Fagnola.

The violin, is considered by French expert Jacques Français to be one of the best sounding instrument in the world. It is featured in the Eugene Gand catalogue. We have demonstrated the entire catalogue to be a fraud, entirely encrypted by Annibale Fagnola.

The violin is currently played by Augustin Hadelich and was owned by Henryk. Szeryng.

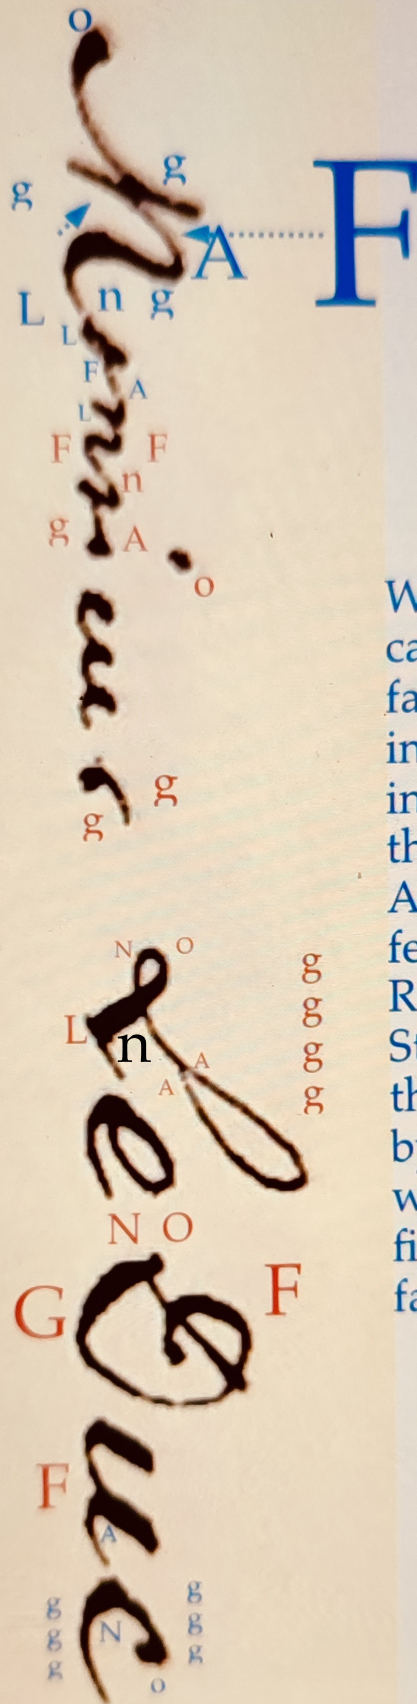

Our scientific decryptions of Annibale Fagnola ciphers.

Double F

F

F

Each and every inscriptions of all Stradivari-Guarneri del Gesù, including their false chains of possession, are entirely ciphered by Annibale Fagnola.

Which means the deceptive catalogue being created to falsely give evidence the instruments it contains to be in existence in France, before they were fabricated by Annibale Fagnola and his fellow luthiers team (Enrico Rocca, Eugenio Degani, Stéfano Scarpella ect., all their labels being encrypted by Fagnola), and all secretly working for the English firms Hart&Son, Hill's family.

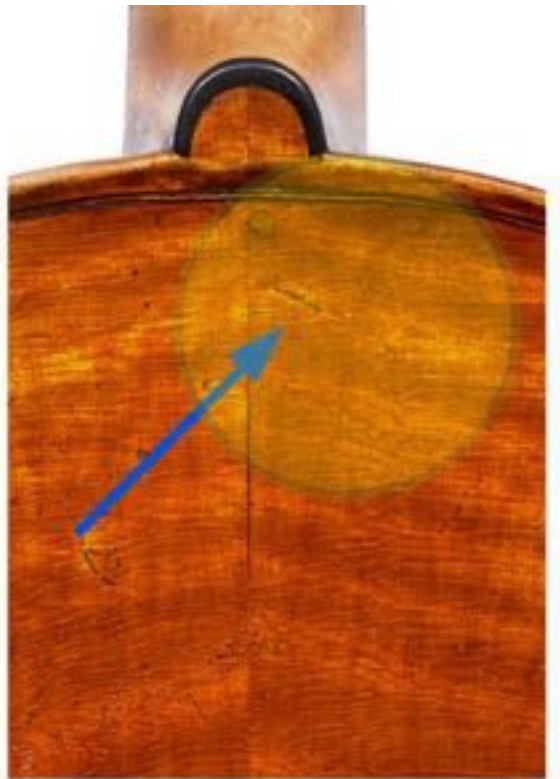

Other angle

The violin, on its back, is
ciphered and branded
“Fagnola”.
