Vixen Hill Home Products

Western Red Cedar cants from Canada are milled in-house and only vertical grain boards are selected for production, no finger-joints, no cheap lumber.

Natural wood has been a historical favorite for several reasons:

- Its unmatched beauty, unique grain pattern, natural variations in color giving them a warm, organic feel;
- Western Red Cedar has a natural resistance to both insects and decay, with a very long lifespan;
- It is light-weight which prevents sagging over time, also making the installation easier;
- Of course, chemical free;
- Cedar shutters are highly customizable with a large variety of stain and color options;

Vixen Hill's shutters are of sturdy construction with a 1 3/8" thickness. If you are looking for authenticity and natural beauty - Cedar Shutters are it!
