# INTRODUCTION

# PURPOSE OF THE ACCOMPLISHMENTS + ANNUAL LISTING OF OBLIGATED PROJECTS

This report was prepared as an overview of transportation investments in the Lehigh Valley. It also serves as a reference to specifically highlight the accomplishments of transportation improvement projects within the region. Additionally, this report is the convey to the public the Annual Listing of Obligated Projects to fulfill federal transportation requirements. Federal regulation states that: “An annual listing of projects, including investments in pedestrian walkways and bicycle transportation facilities, for which federal funds have been obligated in the preceding program year shall be published or otherwise made available through the cooperative effort of the state, public transportation operator(s), and metropolitan planning organization. The listing shall be consistent with the categories identified in the TIP.”

These requirements were first established under the Fixing America’s Surface Transportation Act (FAST Act) and continued in the subsequent Infrastructure Investment and Jobs Act (IIJA) commonly referred to as the Bipartisan Infrastructure Law (BIL), which authorizes federal funding for transportation projects. The BIL enables the United States Secretary of Transportation to authorize funding to Metropolitan Planning Organizations (MPOs) across the United States, through the Federal Highway Administration (FHWA) and Federal Transit Administration (FTA).

## 2025 ACCOMPLISHMENTS

A listing of projects and programs that were completed or substantially completed where no additional federal funding obligations have been authorized and the project is open for public use.

## 2025 UNDER CONSTRUCTION

Projects that are actively under construction where physical work is happening during the federal fiscal year 2025. Not all projects that are accomplished or under construction were obligated funding during 2025. These projects may have had prior federal fiscal years obligations that authorized the project to commence, however construction time frames can sometimes last many years, sometimes past the original obligation year.

## DEOBLIGATED PROJECTS

Deobligations are monies not used during a particular phase of the project and have funding that can be reallocated to other eligible phases of other projects. The deobligations or funding may not reflect the current federal fiscal year obligations, and they may have been obligated several years prior as the project progressed through the various phases.

# WHAT IS THE TRANSPORTATION IMPROVEMENT PROGRAM?

The Transportation Improvement Program (TIP) is the Lehigh Valley's four-year plan to maintain and enhance the transportation system in Lehigh and Northampton Counties. It is updated every two years, and this update is just one part of an overall plan to create a seamless network where roads, trails, sidewalks, technology and transit connect everyone to every place. The TIP is critical to the economic and social future of the region, targeting infrastructure investments that support a vibrant, inclusive, resilient and growing Lehigh Valley.

The TIP details the planned expenditure of federal funds and state capital funds for specific projects and programs within specified limits of fiscal constraint. Fiscal constraint requires only utilizing the amount of money allocated for specific funding categories and project types. TIP development is a rigorous process that includes significant opportunities for public engagement to provide for involvement and comment on transportation projects considered with a look at the region as a whole and indiscriminate of individual municipal boundaries within Lehigh and Northampton Counties.

The TIP and the overall plan are administered by the Lehigh Valley Transportation Study (LVTS), the federally designated Metropolitan Planning Organization (MPO) for Lehigh and Northampton Counties. As the MPO, the LVTS completes and implements two major foundational planning products, along with additional plans, studies and report. All of this work is done with the input of local officials, transportation agencies and the public. This is achieved through collaboration and meetings of the LVTS Technical and Coordinating Committees.

## Federal Regulations Require That the TIP Shall:

Cover a period of at least  
**3 YEARS**

Consist of projects from  
*FutureLV: The Regional  
Plan*, the locally developed  
transportation plan

Reflect the area's  
transportation needs  
and priorities

Include realistic cost  
and revenue estimates  
for all projects

Include all highway,  
bridge and transit  
projects to be funded  
with federal money

## PLANNING PRODUCTS

### The Metropolitan Transportation Plan (*FutureLV: The Regional Plan*)

*FutureLV* sets the vision and direction to carry the Lehigh Valley to 2050 and beyond. It provides a blueprint for managing future growth, making the most of our assets and creating a Lehigh Valley where everyone has access to health, opportunity and a livable neighborhood. A key component of *FutureLV* maps out a 25-year plan to maintain and enhance the transportation network. This 25-year plan is the result of the Transportation Needs Assessment community engagement campaign, which included 30 public meetings around the region and more than 1,000 responses to a survey on transportation policy priorities.

### The Transportation Improvement Program (TIP)

The TIP covers the most current four-year period of the Long-Range Transportation Plan and is the means by which funds are allocated to regional transportation projects. As part of implementing these plans, the LVTS is responsible for developing and updating the TIP to meet federal planning requirements and address local needs.

# ACCOMPLISHMENTS

October 1, 2024 Through September 30, 2025

**The Transportation Improvement Program (TIP) is the locally endorsed list of highway, bridge and transit projects proposed to be implemented with federal assistance. The federal and state governments designated the Lehigh Valley Transportation Study (LVTS) as the body responsible for preparing the TIP for Lehigh and Northampton Counties. This report of completed projects in federal fiscal year 2025 for the 2025-2028 TIP that was adopted June of 2024.**

Every two years, the LVTS works in partnership with PennDOT, LANTA and area local officials to identify priority transportation needs and develop a new TIP to address these needs over the next four-year period. The TIP sources projects from the Metropolitan Transportation Plan (MTP) within *FutureLV: The Regional Plan*, the comprehensive plan for Lehigh and Northampton Counties.

MTP delineates how available and projected transportation funds will be spent over a 25-year period. MTP also outlines a vision of the future of transportation in the Lehigh Valley through a series of projects that involve the Goals and Policies of *FutureLV: The Regional Plan*.

The TIP details the planned expenditure of federal funds and state capital funds for specific projects and programs within specified limits of fiscal constraint. Fiscal constraint requires only utilizing the amount funding allocated for specific funding categories and project types. TIP development is a rigorous process that includes significant opportunities for public engagement to provide for involvement and comment on transportation projects considered with a look at the region as a whole and indiscriminate of individual municipal boundaries within Lehigh and Northampton Counties.

# PERFORMANCE-BASED PLANNING + PROGRAMMING

The LVTS TIP follows a Performance-Based Planning and Programming (PBPP) process, with a focus on collaboration between PennDOT, FHWA, and the LVTS at the county and regional levels. These activities are carried out as part of a cooperative, continuing, and comprehensive (3C) planning process which guides the development of various plans and programs. The 3C process enables valuable coordination and public engagement with a focus on the policies of the LVTS and state and federal guidelines.

The completion of these projects also aligns with the FHWA and PennDOT Asset Management as well as Transportation Performance Management through Performance Measures. These Performance Measures are a set of targets to address various aspects of transportation. These targets and goals are related to safety, infrastructure condition and system performance with a relationship to air quality. Projects are selected to align with adopted Transportation Performance Management, Performance Measures by LVTS to ensure a safe and efficient transportation system.

**Transportation Performance Management (TPM)** is a strategic approach that uses data to make investment and policy decisions to achieve national performance goals. 23 CFR 490 outlines the national performance goal areas for the federal-aid program. TPM is systematically applied through a regular ongoing process. It provides key information to help decision makers understand the consequences of investment decisions across transportation assets or modes or transportation. Communication between decision makers, stakeholders and the public is provided through this management strategy. Ensuring targets and measures developed in cooperative partnerships and based on data and objective information.

These goals are embedded within three specific Performance Measures and targets adopted by the Lehigh Valley Transportation Study. Performance targets should be data-driven, realistic, and attainable and should align with the performance management framework and legislative intent.

# PERFORMANCE MEASURES

## Safety Performance Measures (PM1)

Five safety performance targets have been established and are updated annually. The measures are based on crashes that result in fatal and/or serious injuries. The targets assist the LVTS and PennDOT in addressing areas of concern for fatalities and serious injury.

### Safety Performance Measures:

- Number of fatalities
- Rate of fatalities per 100 million vehicle miles traveled
- Number of serious injuries
- Rate of serious injuries per 100 million vehicle miles traveled
- Number of non-motorized fatalities and serious injuries

**The goal of the Performance Measures is to collect data and target transportation investments to improve the system with the end result of a project selection process rooted in data and analysis to enhance transportation system performance.**

Projects for the MTP and the TIP have been selected to align with adopted Performance Measures by LVTS to ensure a safe and efficient transportation system consistent with state and national transportation objectives.

## Pavement/Bridge Performance Measures (PM2)

The Pavement/Bridge Performance Measures (PM2) apply to both pavement and bridge condition and are only applicable to the National Highway System (NHS). Conditions are rated as either Good or Poor and provide targets that are consistent with PennDOT's asset management objectives of maintaining the system in the state of good repair, managing to lowest life cycle costs, and achieving national and state transportation goals.

## System Performance Measures (PM3)

The System Performance Measures (PM3) are six measures which assess performance of the National Highway System (NHS), Freight Movement on the Interstate System, and the Congestion Mitigation and Air Quality (CMAQ) Improvement Program. The LVTS and PennDOT continue their efforts to ensure the TIP and the LRTP are developed and managed to support progress toward the achievement of the statewide system performance targets.

### System Performance Measures:

- Interstate Reliability
- Non-Interstate National Highway System Reliability
- Truck Reliability Index
- Annual Peak Hours Excessive Delay Hours Per Capita
- Percentage Non-Single Occupied Vehicle Travel
- Vehicle Emission Targets

# Total for **ACCOMPLISHED PROJECTS**

October 1, 2024 through September 30, 2025

During 2025, TIP projects with investments of

Lehigh Valley Transportation Study

# ANNUAL LISTING OF OBLIGATED PROJECTS

October 1, 2024 Through September 30, 2025

**Obligations are shown for all projects in Lehigh and Northampton Counties, including those projects outside of the control of the Lehigh Valley Transportation Study funding allocations and formulas such as the Interstate Program. Obligations for the Interstate System for example are shown in this report. The Interstate Management Program is administered by PennDOT Central Office.**

Obligations are shown by project phases and include the funding source. Projects have many phases even before construction can begin. These phases include Preliminary Engineering (PE), Rights-Of-Way (ROW), Utilities (UTL), Final Design (FD), Construction (CON) and Study/Planning (S/P) or implementation of the project.

To fulfill this requirement, the 2025 LVTS Annual Listing of Obligated Projects shows all money obligated for highway, bridge, transit, bicycle and pedestrian projects within Lehigh and Northampton Counties for the Federal Fiscal Year (FFY) 2025, which is the time period of October 1, 2024, to September 30, 2025.

# Total Obligations for **LANTA TRANSIT PROJECTS**

October 1, 2024 through September 30, 2025

# \$2,031,823

The Lehigh and Northampton Transportation Authority (LANTA) was the recipient of \$2,031,823 in Federal Transit Administration (FTA) funding obligations for various public transit grants that were awarded. These funding obligations differ from the FHWA obligations for highway, bridge and enhancements/grant projects. These Transit funding categories and authorizations ensure safe and efficient public transit for the Lehigh Valley as a whole. LANTA's services are to meet basic transportation needs, support desired economic and environmental goals, and appeal to an increasing number of people. Services are to be comprised of a range of types, provided directly or through contract. The Transit Obligations through FTA grants awarded to LANTA help provide these services and ensure a safe and efficient public transit system for the Lehigh Valley.

Lehigh Valley Transportation Study

# CONCLUSION

## Accomplishment + Annual Obligated Projects

**The Accomplishments + Annual Listing of Obligated project is a product of the continuing, comprehensive and cooperative process of the LVTS, FHWA, FTA and other transportation stakeholders including the general public. This process is the foundation of the region's Long-Range Transportation Plan/Metropolitan Transportation Plan and Transportation Improvement Program which leads to projects being obligated or accomplished in this report.**

Federal investments, or obligations, of \$53,754,280 were committed to 41 Highway, Bridge, and Enhancements/Grant projects during the federal fiscal year of 2025. During the same period, \$7,563,600 was deobligated, or saved, on 29 projects that came in under budget, enabling those funds to be committed to other approved projects in the region. Investments, or obligations, of \$5,603,640 were committed to five Interstate 78 projects, through the Interstate Management Program for projects that were included on the State Transportation Improvement Program. During the same period, \$2,260,663 was deobligated on two interstate projects in the region. In addition, another \$401,659,004 in projects remain under construction. Finally, \$2,031,823 was obligated to the Lehigh and Northampton Transportation Authority (LANTA) public transit operation through the Federal Transit Administration to ensure and equitable and robust public transportation system regionwide.

**All together, these investments show a continuing federal and state commitment to maintaining the transportation network of a region of more than 700,000 people.**

# GLOSSARY

**Activity Line Item (ALI)** is the Federal Transit Administration (FTA) coding for specific activities related to grants and funding of transit projects and operations.

**Agency Name** identifies the public transportation agency responsible for administering and implementing projects sourced with public transportation funding streams.

**Annual Listing of Obligated Projects (ALOP)** is a federally required listing of highway, bridge and transportation projects, including investments in pedestrian walkways and bicycle infrastructure transportation facilities, for which federal funds have been obligated in the preceding year, which shall be published or otherwise made available by the cooperative effort of state, transit operators and metropolitan planning organizations for public review. In accordance with regulations 23 U.S.C. 134 (j)(7)(B), 49 U.S.C. 5303 (j)(7)(B) or 23 CFR §450.334.

**Category** describes the type of project.

- **Highways** are roadway projects that restore an existing highway to an acceptable condition or improves the roadway through the following types of work: pavement resurfacing, widening, shoulders, alignments, stormwater management, guiderails and other infrastructure.
- **Bridges** are projects related to elevated structures carrying modes of transportation over another physical feature such as another roadway, natural features such as a river or other transportation facilities such as rail lines.
- **Enhancements/Grants** are projects that received competitive grant awards for alternative transportation projects and improvements. They may also involve substantial grants awarded to projects from federal competitive grant award(s) that must be reported by the LVTS and the Annual Listing of Obligated Projects.
- **All** are generally line-item projects that support all aspects of transportation projects Highway, Bridge and Enhancements / Grants.

**CMAQ** is Congestion Mitigation and Air Quality.

**Congressional District** is a territorial division of a state from which a member of the United States House of Representatives is elected.

**County** is the geographic county in which the project is taking place. Specific locations are geographically categorized by PennDOT. All projects for LVTS are of regional importance to both Lehigh and Northampton Counties identified during collaboration through the project selection process during TIP development.

**Deobligations** represent the amount of federal authorizations no longer need for a specific phase of a project during federal fiscal year 2024. These funds may be reallocated to other regional projects that meet the funding criteria.

**Federal Fiscal Year** is the calendar timeframe from October 1, 2023 through September 30, 2024.

**Federal Funds Awarded** is the amount of funding associated with a specific public transit project or task for a certain time period.

**Federal Fund Category** is funding associated with specific tasks related to implementation of various public transit projects.

**Federal Funding Code** is the numerical number for a specific fund category related to public transit funding

**Federal Funds Remaining** is the amount of funding remaining not obligated to a prior phase or year(s) from the overall allocation of funding for the project.

## Federal Transit Funding Codes

- **5339 Funds** are Federal grants to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities.
- **5307/5340 Funds** are funds for transit capital and operating assistance in urbanized areas and for transportation related planning
- **5310 Funds** provide formula funding to states and designated recipients to meet the transportation needs of older adults and people with disabilities when the public transportation service provided is unavailable, insufficient, or inappropriate to meeting the needs of these individuals.

**FHWA** is the Federal Highway Administration.

**FTA** is the Federal Transit Administration.

**FTA Grant Number** is the Federal Transit Administration Identification number for a specific grant allocation source.

**ITS** are intelligent transportation systems.

**LANTA** is the Lehigh and Northampton Transportation Authority.

**LVTS** is the Lehigh Valley Transportation Study, the federally designated Metropolitan Planning Organization for Lehigh and Northampton Counties.

**Map Identification Number** represents the location number on the map depicting the location of the project.

**MPMS** is the project identification number in the PennDOT Multimodal Project Management System for locating, tracking and reporting on the status of phases of various projects.

**MPO** is the Metropolitan Planning Organization, an organization created and designated to carry out the metropolitan transportation planning process. MPOs are required to represent localities in all urbanized areas (UZAs) with populations over 50,000, as determined by the U.S. Census.

**Municipality** is the county, city, town, borough, or township of the Commonwealth of Pennsylvania associated with the project general location.

**Obligations** represent federal authorizations to proceed with specific project phases for the federal fiscal year of 2024.

**Obligated Federal Amount FFY 2024** is the amount obligated towards public transportation for a specific project or task during Federal Fiscal Year 2024.

**OTH-Flex CMAQ** are funds provided by LVTS to the public transit operator LANTA utilizing CMAQ funding to support various public transit projects.

**PennDOT** is the Pennsylvania Department of Transportation.

**PennDOT District** is the PennDOT engineering District in which the project is taking place. PennDOT District 5-0 is the engineering district that encompasses Lehigh and Northampton counties for the LVTS.

**Performance Based Planning and Programming (PBPP)** is a process focused on collaboration between PennDOT, FHWA, and MPOs at the county and regional levels.

**Performance Measures** are adopted metrics for evaluating various transportation aspects related to safety, mobility, infrastructure condition and air quality.

- **PM1:** Safety
- **PM2:** Asset Condition
- **PM3:** Mobility and Congestion Mitigation and Air Quality (CMAQ)

**Phase of Work** is the list of phases associated with a particular project that is on the Transportation Improvement Program (TIP).

**Not every project will have every phase of a project. However, generally, the projects will have several of the following phases:**

- **Study/Planning (S/P)** – In this phase, a general overview or analysis is performed to identify elements for improvements to an identified project. This phase can be for corridors, potential connections and for enhancing and improving the projected need of a transportation asset.
- **Preliminary Engineering (PE)** – In this phase, a preliminary field survey, utility location, environmental/historical studies, road design alternatives, drawings, final field inspections, and initial public engagement are done. This process can take a few months to several years to complete.
- **Right-of-Way (ROW)** – This is the portion of the project in which negotiations with property owners take place, payments are made, and arrangements with utility companies are finalized to obtain the land necessary for the project. Right-of-Way work does not begin until most of the Preliminary Engineering steps are complete.
- **Utilities (UTL)** – In this phase, ownership of existing or potential new utilities are identified. Coordination of infrastructure that may need to be relocated or otherwise changed to accommodate the project are done with the entities responsible for various utilities. Electric, telecommunications and pipelines are examples of utilities.
- **Final Design (FD)** – is the phase that identifies project-related improvements, materials, quantities and activities. The plans must include sufficient detail to inform project stakeholders (designers, reviewers, contractors, suppliers, etc.) of the actions required to advance the project from design through completion of construction and to satisfy permit conditions. Final Design Plans must also provide reasonable information needed by the contractor to submit a sound, equitable bid and to build the project to PennDOT's standards.
- **Construction (CON)** – In this phase, the project is advertised to prospective contractors for bids. Once the bids are opened and a contract is awarded, construction can begin.

**Program Total** is the overall cost associated and programmed for a project on the Transportation Improvement Program (TIP). Entries that contain “0” are for projects that were deobligated funds and had no obligations associated with it.

**Projects Administrator/Owner** is the agency responsible for implementation of the project/owner of the project location or structure.

**Project Title** is the name assigned to the project.

**Project Description** provides details and the intent of the project as applicable.

**Public Narrative** is a version of the Project Description simplified.

**Requested Federal Amount FFY 2024** is the amount of funding requested by the public transit operator for Federal Fiscal Year 2024 projects and tasks.

**State Match** are Commonwealth of Pennsylvania funds to match certain federal funding requirements.

**State Route (SR)** is the State Route identification number of a PennDOT owned or supported roadway associated with the project if applicable.

**Sub-Recipient** is the public transportation provider receiving the transit funds

**TIP** is the Transportation Improvement Program.

**Transportation Improvement Program (TIP)** is a list of transportation projects—covering a period of at least four years. The TIP must be developed in cooperation with the MPO, state and public transit providers. The TIP should include capital and non-capital surface transportation projects, bicycle and pedestrian facilities and other transportation enhancements to address various Transportation Performance Management requirements.

**Transportation Performance Management** is a strategic approach that uses transportation system information to make investment and policy decisions to achieve national transportation performance goals for safety, asset condition and mobility / air quality. (see Performance Measures)
