

HUDSON VALLEY  
*Natural*

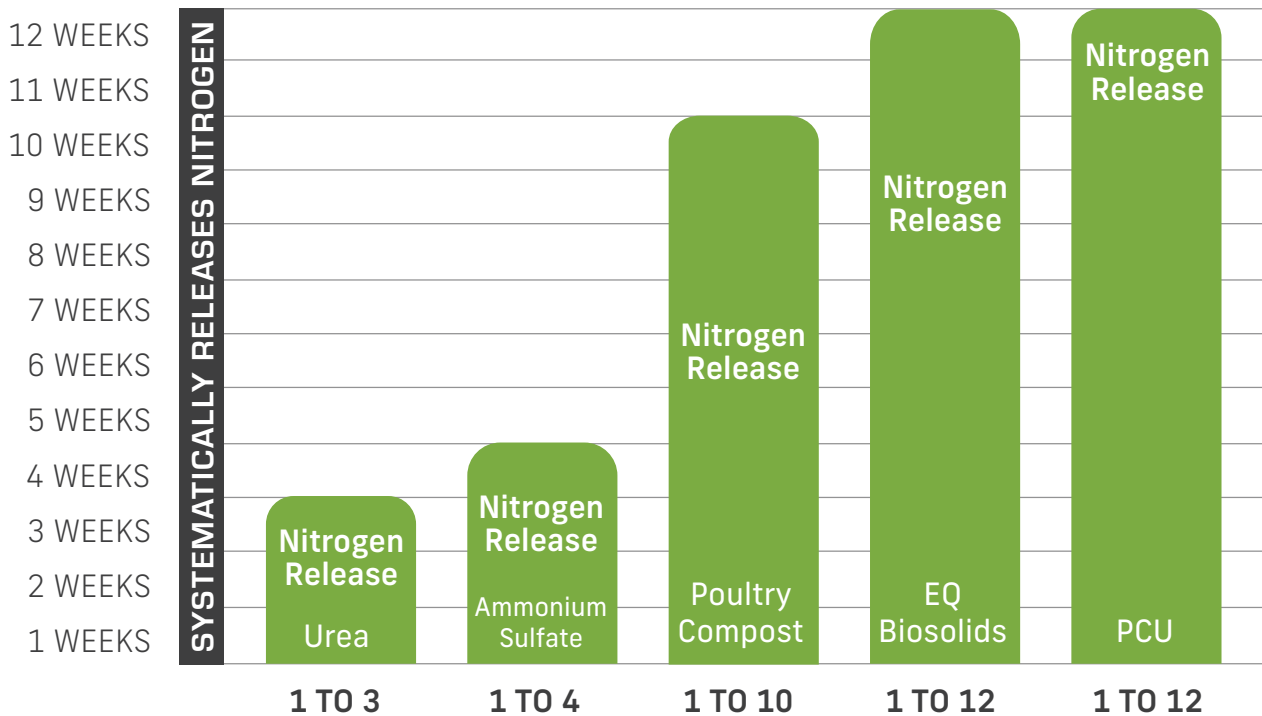

# Jackpot

**17-0-4 50% SRN**  
from PCU, BIOSOLIDS, COMPOST

**OUR #1 SELLING FORMULA**

Low-impact, sustainable solutions

## 5 SOURCES OF NITROGEN

Balanced carbon-to-nitrogen ratios

- + **5 nitrogen sources** provide metered, consistent nutrient release.
- + PCU, urea, and ammonium sulfate deliver a quick **intense green-up** in 7-10 days
- + Two sources of **organic matter** stimulate microbial growth and diversity while providing a good range of nutrients, micronutrients, & beneficial compounds.
- + Low-impact fertilizer allows you to apply to **any turf type**, anytime of year for exceptional color and health
- + Reduced surge growth, **increased disease resistance**, and improved heat/drought tolerance
- + Systematically metered N release helps to keep ground water clean by ensuring nutrients end up in the plant, not the water
- + Low salt index creates a healthier environment for soil microbes.

17-0-4 Jackpot - 40% CRN from PCU- 55% Biosolids and poultry compost- 1% Fe, 2% Ca and 2% S

## LOW IMPACT. SUSTAINABLE. NATURAL AGRONOMIC SOLUTIONS.

**Hudson Valley Natural** offers effective agronomic solutions, delivering nutrient-rich, low-impact products that are friendly for the environment—and safer for children and pets.

Our fertilizers are formulated for enhanced efficiency, ensuring that the plant gets the right amount of nutrients, at the right time. Sustainable resource management and enhanced nutrient efficiency are two pathways for protecting the environment.

## A BALANCED CARBON-TO-NITROGEN RATIO

Carbon based fertility succeeds when carbon and nitrogen inputs are applied in ratios that optimize nutrient uptake. We feed the microbes to enhance microbial & plant relationships creating a healthier growing environment.

Jackpot and our other organic based fertilizers provide a programmatic approach to seasonal fertility that delivers the correct ratio of carbon to nitrogen for optimal plant health.

## Jackpot and Our Other Low-Impact Fertilizers

- » Offer a consistent, reliable, **quick green up** with **long-lasting results**
- » Can be applied *any time of the year*, on **any turf type**
- » **Reduced labor costs** by using an efficient, long-last formulation
- » **Reduce call backs** by building stronger cell walls for healthier, more disease-resistant and insect-resistant plants
