

HOW IT WORKS

GRASS PANELS can be used on most any outdoor or indoor level surface. Individual panels are assembled and finished with edges to your specific dimensions. Then add whatever boundary is needed for your activity. **GRASS PANELS** are great for temporary or semi permanent sports/play surfaces for soccer, football, general play surface and many others. Easily convert most any level area suitable for your outdoor or indoor activity.

- Determine the size of your play area.
- Determine the number of panels and edging needed.
- Join the panels by using the built-in interlocking system.
- Secure the edges with protective trim.
- You're ready to play.
- Ideal for outdoor or indoor use

USES

Indoor and outdoor playing surfaces:

- Mini Soccer
- Lacrosse
- Softball
- Football
- Tennis
- Bocce Ball
- General Play Areas

GRASS PANELS

Interlocking Synthetic Sports Turf Panels

*Put them
together in
minutes
and play.*

The original modular synthetic turf grass panel using **GREEN BLADE TECHNOLOGY**, a patented process using chlorophyll in manufacturing.

Ideal for all types of indoor and outdoor sports and recreational activities such as soccer, football, putting, training, parties, patios, lawns and many more.

GRASS PANELS

PowerLock

Our **PowerLock GRASS PANELS** are twin sheet molded with synthetic grass applied in a unique proprietary process giving it soft playability with rugged durability suitable for temporary or permanent indoor or outdoor usage.

PowerLock GRASS PANELS are assembled quickly and efficiently with an innovative locking device that holds them tightly together during use but allows for expansion and contraction during temperature change. The panel can also be quickly unlocked and separated for temporary installations. Edging is also available to make your installation complete.

Panel Specs

Size – overall 33" x 33"
 Size – surface 30" x 30"
 Weight – 8 - 9 lbs

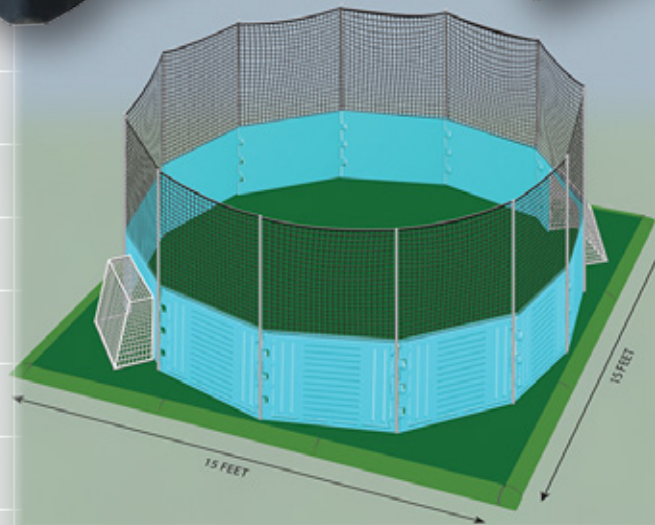

QuadraLinks

Our **QuadraLinks GRASS PANELS** are molded from expanded polypropylene pellets, EPP. The panel is designed to lock together with a series of alternating posts and sockets in an overlapping method to create a seamless playing surface. Great for recreational or home installations.

QuadraLinks can be customized to your needs with a variety of synthetic grass surfaces that are made of soft and durable polyethylene. Edging is also available to make your installation complete.

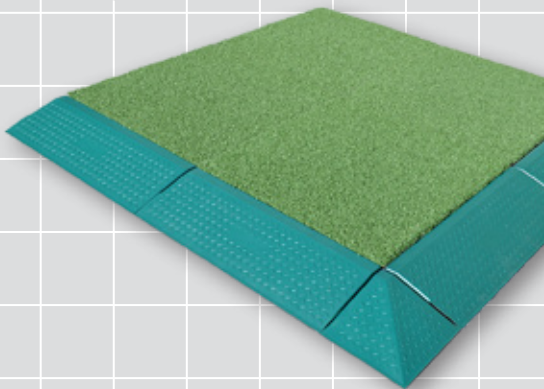

Panel Specs

Size – overall 33" x 33"
