WATER APPLICATION

CPVC

PIPES & FITTINGS

Made of chlorinated polyvinyl chloride, MARVEL CPVC Pipes & Fittings are manufactured according ASTM D-2846 respectively. MARVEL CPVC Pipes & Fittings offer a long-lasting and cost-effective solution for hot and cold water in plumbing and potable Water application

Features and Benefits:

- Smooth continuous flow of water due to smooth inner surface
- Low thermal expansion & conductivity
- Easy to handle & installation
- Flame & smoke resistant
- Most cost - effective
- Chemical resistant

Installation Procedure

1. CUT PIPE

Cut Pipe Square. As joints are sealed at the base of the fitting socket. An angled cut may result in joint failure.

Acceptable tools include miter saw, mechanical cut o saw or wheel cutter. Wheel type cutters must employ a blade designed for plastics.

2. Remove Burr & Bevel

Remove all burr from inside and outside of pipe with a knife-edge, file or deburring tool. Chamfer (bevel) the end of the pipe 10°-15°

Remove surface dirt, grease or moisture with a clean dry cloth.

3. Dry Fit

With light pressure, pipe should go one third to one half of the way into the fitting socket Pipes and Fittings that are too tight or too loose should not be used.

4. Applicator

Use an applicator that is one half the pipe diameter.

Too large an applicator will force excessive cement into the inside of small diameter fittings. Too small an applicator will not apply sufficient cement to large diameter systems.

5. Solvent Cement

Apply a full even layer of cement to the outside of a pipe and medium layer of cement to the inside of a fitting.

6. Set And Cure

Solvent cement set and cure times are a function of Pipe size, temperature and relative humidity. Curing time is shorter for drier environments, Smaller sizes and higher temperatures. It requires 10 to 20 minutes for perfect joint.

COLD WATER
APPLICATION

uPVC

PIPES & FITTINGS

ORRIL High pressure uPVC solvent weld plumbing systems are the most suitable, easy and economical solution for transportation and distribution of potable water. This system is very easy to install and is functionally most suitable for plumbing applications like down-take and up-take lines, terrace looping and concealed pipe work in any building or construction. **ORRIL** uPVC is a value added long-term plumbing solution for the building industry.

Features and Benefits:

- Excellent resistance to corrosion and chemical attacks
- Maintenance – free & easy to install
- Simple and leak proof joint
- Designed to last for ages
- Most cost effective
- Uv resistant
- Lead free
