Highland Hills Fall 2021

Sign Our Petition to Save Bellevue's Trees in 2022

Trees are coming down at an alarming rate, and we have little in place to stop it. Demolition permits have been up 75% in the last decade. Please Join Trees4Livability, a local nonprofit formed by concerned Bellevue citizens, urging the City Council to update Bellevue's tree codes to protect our tree canopy in 2022!

We compiled a detailed Tree Code Study with findings and recommendations, which we're presenting to the City Council before their March retreat. We compared Bellevue's tree codes with other nearby cities. Bellevue's are among the weakest in the region. Sign the petition to show your support!

Significant Trees: are 8" in diameter, measured 4' above grade, and take about 45 years to grow.

5

Is the number of trees landowners can cut down in Bellevue without a permit.

0

Is the number of other cities in our region that also allow this.

The Trees4Livability Tree Code Study is endorsed by:
