5 ☰ General commitment time to foster	Should be eating confidently on their own; should be weighed to monitor health.	E

Match A – E with the correct number

1 goes with _____

2 goes with _____

3 goes with _____

4 goes with _____

5 goes with _____

2. Kittens with mamas need you to do the following: (Choose the correct answer)

- Put in a heat source to keep them warm
- Weigh them daily
- You don't need to do anything, the mommy takes care of them at this point.

3. Successful fostering will include: (Check all the correct responses)

- Weighing the kittens throughout their time with you to ensure they are gaining weight and healthy.
- Taking them to their service appointments
- Bathing them daily
- Kitten-proofing the environment they will be in.
- Monitoring your kitten's behavior throughout their time with you

4. Many of the kittens that come to Kitten Central are orphans and neonates which means they will need to be bottle fed. Test your understanding of the process of bottle feeding. When bottle feeding a 2-week-old kitten you should always: (Choose all the correct answers)

- Wrap the kitten in a blanket
- Warm the formula
- Weigh the kitten at each feeding
- Rewarm the bottle formula from the previous feeding so as not to waste it
- Feed him with his/her belly down

5. What is the proper procedure for storing kitten formula? (Choose 1)

- Store the opened formula container in a cool, dry shelf
- Mix all of the formula first, then store in the refrigerator for a month
- Always store any opened container of dry formula in the refrigerator

6. Check all the steps you need to take each time when feeding a neonate kitten.

- Warm the formula
- Give the kitten a bath
- Wash and scrub the bottle
- Weigh the kitten
- Microwave any leftover formula to kill germs
- Potty the kitten
- Mix freshly made formula each time you feed the kittens

True or False

7. Kittens should be pottied at each feeding ___ True ___ False
