

North[★]

Get an edge. Go North.

Reduce processing costs with the Edge Program, from payment technology leader North.

What is Edge?

Edge is North's innovative dual pricing program that combines our Flat Rate Pricing and Cash Discount Programs to apply both a "cash" price and an "other payment" price to every item.

How does Edge work?

You secure one low rate on every transaction. Then, through the use of our cash discount programming, all items are assigned two prices, including a discounted cash price.

Upgrade to Edge today! Contact us for more details.
