CLEAN MOUNTAIN

COMMERCIAL DISINFECTING SYSTEMS

We kill 99.999% of ALL Viruses
We kill Coronavirus - COVID-19

Clean Mountain uses an EarthSafe disinfecting solution and a Sustainable / Eco-Friendly method of application.

Our Electrostatic Decontamination System

(Electrostatic charged droplets create a field in the spray plume that is magnetically drawn to any surface within 6 feet. With an attraction coefficient 15 times greater than gravity, the electrostatic force field is so powerful the plume reverses direction to coat hidden and hard to reach surfaces that would typically be missed by conventional spraying, wiping or misting equipment.)

Our decontamination agent is Sodium Dichloroisocyanurate (NaDCC) this is an organic molecule and is NOT caustic like bleach.

OUR kill application contact time:
COVID-19 is just 5 minutes!

Clean Mountain is committed to helping our community prevent and fight against outbreaks of the most dangerous healthcare pathogen Coronavirus COVID-19....

So we all can Live Safely together!
