

PENDPAC

A Division of Labrie Enviroquip Group

ALLEYGATOR ZERO

Wittke *RetroFL*

SPRINTER

ALLEYGATOR ZERO

The AlleyGator Zero from Pendpac represents innovation in solid waste collection technologies. Simplicity of use and maintenance lowers our customers' TCO (Total Cost of Operation). The AlleyGator represents several competitive advantages over our competitors, which include:

- **No “Kick Out” zero lateral arm**
- **Patented Vertical Lift Design**
- **Alley Friendly requires less lateral space**
- **Operates at Idle reducing fuel use**
- **Enhanced “Self Cleaning”**
- **Less Truck Rocking decreasing fatigue**
- **No Packer Rails**
- **Advanced Hydraulics design**

SPRINTER

The Sprinter is the ideal choice for those who need solid reliability and quick route times built into one solid package. The advanced design delivers a lower total vehicle weight and allows for a higher packing capacity than our competitors. This allows greater flexibility and lower Total Cost of Ownership (TCO) for our customers compared to other commercial side load products.

- **Environmental Benefits**
 - Light weight, high compaction, and speed in operations
 - Increases fuel efficiency and decreases fossil fuel impacts.
 - Zero lateral movement arm, no kick out
- **Low Maintenance**
- **Low Profile**

PREDATOR

The Predator combines the strength of an Impac with a collection system for leafs and light debris. This year-round multipurpose trash and refuse vehicle is unmatched in its versatility. The super-hardened AB (Abrasive Resistant) steel mulching blades chop small branches, leaves, and grass cuttings (wet or dry) into tiny bits allowing for greater load compaction.

- **Active Compaction System**
- **Heavy Duty Vacuum**
- **Versatile**
- **Belt-Driven Blower Assembly**

Wittke *Retro*FL

The Pendpac WITTKE FL design, production, and serviceability represent over 100 years of front-loader experience. This translates to superior customer service, excellent quality, and peace of mind in a market plagued by unproven designs. Pendpac is the leader in front-loader experience!

- **Light Weight - Low Profile Design**
- **Advanced and Proven Control System**
- **Environmentally Friendly**
- **Simple and Clean**
- **Advanced Packer**

IMPAC

The Impac is a perfect solution for those seeking the most from their waste transportation systems. The Impac has a side loading compaction system perfect for commercial side load containers, fully automated for the one man, "in-cab" operation and with its large hopper area, it helps to keep overhead down allowing for more time spent "picking up" and less time dumping.

- **Speed**
The ARM moves from ground to ground operation at a lightening 20 seconds. This allows for maximum curbside pickup in less time.
- **Driver and Mechanic Safety**
The motion of the ARM is fluid and constant with smooth transitions on all pick up loads up to 400 gallons. This decreases driver fatigue and repetitive motion injuries due to rocking.

PARTS

Pendpac refuse vehicle parts are offered exclusively through the Pendpac Parts Pavilion and Pendpac authorized dealers. The quality and reliability of Pendpac parts are second to none in the industry. Pendpac Parts Pavilion Depots are located throughout the United States and Canada.

Only Pendpac OEM parts may be used for vehicles under warranty. Pendpac also offers parts and ARM replacements for the following product lines*: McNeilus™, Heil™, Wittke™, Leach™, Labrie™ and many others.

Manufacturing from a 745,000 sq. ft. facility with a state-of-the-art specialized production area of 140,000 sq. ft. equipped with the latest in CNC fabrication machinery, 60 welding stations, over 50 hoists and bridge cranes, shot blast equipment, and liquid & powdercoating paint systems. Building on this experience, Pendpac continues to make advances into the waste equipment industry. Our broad knowledge of complex hydraulic systems, electrical controls, specialized welding techniques and precision engineering allows us to meet the demands of the customers we so proudly serve. This experience coupled with our large manufacturing facility permits us to produce a quality product in a timely fashion. Whether your needs are for large volumes of standard product or smaller orders of custom designed equipment, Pendpac's team of engineers, salespeople, and technicians always provides you with the best service and value in the industry.
