

EpoMini 5

Therefore, mechanical spreading is not only a money-saving idea, the environmental damage is reduced so much that the negative contamination effect is turned into a positive fertilizing effect. In connection to this it is worth mentioning that the EpoMini 5 is as suitable for spreading fertilizers in the summer as it is for spreading salt in the winter. Furthermore, the mechanical spreading ensures an even and homogeneous thawing which even the most meticulous spreading with a shovel is not able to accomplish. EpoMini 5 is road speed related; i.e. the desired quantity per m^2 remains constant regardless of variation in speed.

Capacity	50 litres	1.8 cubic feet
Total Width	750 mm	29.5 inches
Spreading Width	550 mm	22 inches
Weight	30 kg	66 lbs.
Linear Working Range (Salt) @ typical application rates	6 km	3.7 miles
