

Vac-Con vs The Competition Hose Reel Design

As illustrated above, the Vac-Con power **Articulating Hose Reel** covers more unique & usable hose reel positions than the competition.

All 12 of our unique positions are useable and allow the operator more range and reach.

Of the 11 positions possible with a simple rotating reel, 7 of them are unique & useable and 4 of them are redundant and could more easily be reached by backing up the truck.
