...and that's billion #ice #candles #globe

4.567 Billion years old. We are here at the behest of our host. Fresh water and life itself hang in the balance. The earth's rising temperature is a worldwide concern. Our very survival as a species and the protection of all living creatures is paramount. With respect to the Earth's Age, we acknowledge we are but a fleeting presence. Recognizing that life itself is a gift this created image comes from the heart.

WHAT MAKES THIS PHOTO GREAT?

Composition 1 Lighting 1 Creativity 1 Story 1

I love how creative you got with this image, Lizabeth. The Earth has been around for a long time and we should keep it that way by not destroying it. On Your Shot it is always amazing to see the creativity that
