Litter Name: _____ Forever Name: _____

Within this agreement MLC Labradors will be referred to as the seller and the person buying the puppy/dog will be referred to as the purchaser or buyer. Any references to the puppy/dog is interchangeable for either a puppy or a full grown dog. The seller expects that this puppy will be part of the family and treated as such. The seller is not responsible for allergies, immunity levels, mites, pneumonia, mange, heat stroke, ringworm, conjunctivitis, intestinal worms and parasites, fleas, ticks, ear infections, coccidiosis, parvovirus, giardiasis, underbite, overbite, undescended testicles, inverted / hooded vulva, and/or umbilical hernias. At any point in the lifetime of the puppy/dog, if a puppy/dog becomes overweight this contract becomes null and void.

Initial _____

Medical History:

Buyer agrees to give permission to seller and/or seller's vet of choice to obtain medical records/imaging/results of testing from buyer's vet when medically necessary. This will be done only when the overall health of the dog is in question and with buyer's knowledge. In the event that the seller's vet has different findings than the buyer's vet, the seller's vet's findings shall rule.

Initial _____

Limited Registration:

The puppy is being sold with AKC limited registration. This means the puppy comes with no breeding rights. The puppy is intended to be a pet/companion only. If the puppy produces any offspring then all health guarantees within this contract will be null and void. We highly recommend having the puppy spayed or neutered after twelve months of age and or after the first heat cycle.

Initial _____

Genetic Guarantee:

The puppy is guaranteed to never receive an affected result for any genetic disease, in which both sire and dam have been tested for. The sire and dam have both been tested for Centronuclear Myopathy (CNM), Degenerative Myelopathy (DM), Exercise-Induced Collapse (EIC), Hereditary Nasal Parakeratosis (HNPK), Progressive Retinal Atrophy/ Progressive Rod-Cone Degeneration (PRA-PRCD, PRCD), Retinal Dysplasia/Oculoskeletal Dysplasia 1 (RD/OSD), and Skeletal Dysplasia 2 (SD2). In the event that the puppy receives an affected result from a genetic testing company the puppy must be retested again from another outside genetic testing company. This will be done at the buyer's expense, through a genetic testing company of the seller's choice. If the second test comes back as unaffected, that test shall rule. If the second test comes back as affected, a replacement puppy will be offered. The puppy will be replaced with a puppy of equal value from a future litter. To receive a replacement puppy the puppy being replaced must have proof of being fixed. When one becomes available and after the

seller receives documentation of spay/neuter. If the replacement puppy is of greater value the buyer is responsible for the difference of price. If the puppy is not spayed/neutered and the seller does not receive documentation within 12 months no replacement puppy will be given. If the original puppy is not fixed within 12 months of diagnosis, no replacement will be given. If the buyer does not wish to keep the puppy, the buyer must have the puppy spayed/neutered at their expense. The puppy is then to be returned to the seller. A replacement puppy will be offered from a future litter once the puppy has been returned to the seller.

Initial _____

Hip and Elbow Guarantee:

The puppy is guaranteed for 12 months from date of birth against genetic/hereditary hip/elbow Dysplasia. Environmental conditions play a large part in this disease. Puppies should not be participating in training or exercise involving jumping, long distance running ect. Nor shall the puppy be allowed to jump in and out of vehicles, jump on and off beds/couches/chairs etc. Puppies and dogs should also maintain a correct weight for their age, if the puppy or dog becomes overweight the hip and elbow guarantee is no longer in valid. Seller is not responsible for environmental Dysplasia. If a licensed, certified vet validates genetic/hereditary Dysplasia and the seller's vet also confirms genetic/hereditary Dysplasia the said puppy will be required to be spayed/neutered at the buyer's expense. Buyer must provide all images and medical reports to the seller's vet. Paperwork must be provided to the seller proving the puppy was fixed. The puppy will be replaced with a puppy of equal value from a future litter. To receive a

replacement puppy the puppy being replaced must have proof of being fixed. When one becomes available and after the seller receives documentation of the puppy being fixed. If the replacement puppy is of greater value the buyer is responsible for the difference. If the puppy is not spayed/neutered and the seller does not receive documentation within 12 months no replacement puppy will be given. If the seller's vet determines the hip/elbow Dysplasia is environmental and not genetic/hereditary no replacement puppy will be given.

Initial_____

Lifetime Support:

If at any point the buyer can no longer care for the puppy/dog the buyer is to contact the seller about the puppy/dog. The buyer and seller will then discuss options regarding the situation. The buyer is not allowed to rehome or sell the puppy/dog without written permission from the seller. If the seller deems the puppy/dog is to be returned to their care, it will be at the buyer's expense. All documents related to the puppy/dog must be returned to the seller along with the puppy/dog. Including but not limited to AKC registration, vet paperwork and the buyer's copy of the contract. **NO REFUND WILL BE ISSUED TO THE BUYER.**

Initial_____

Media Release:

I, the buyer, grant permission to MLC Labradors, to use any form of photographs/videos sent to MLC Labradors and or shared on buyer's personal social media accounts. The seller has the rights to use the photographs/videos as they see fit for but not limited to advertising and updating on our personal and business social media accounts and websites.
