

MongoDB Developer and Administrator Certification Training

About the Course

The age of Big Data has brought a torrent of unstructured data in its wake, information that is needed to perform crucial real-time analytics. MongoDB is the ideal tool for handling the challenges of Big Data, so an analyst who becomes an expert in this database will be the ideal position to take on this data flood. Become an expert MongoDB developer and administrator by gaining an in-depth knowledge of NoSQL and mastering skills of data modeling, ingestion, query, sharding, and data replication. The course includes industry-based projects in e-learning and telecom domains. It is best suited for database administrators, software developers, system administrators, and analytics professionals.
