

JUST MY OPINION

Roger R. West

I am so sick and tired of the liberal left and their news media, I could almost scream. How much further are they going to go? It is now President Trump's fault that Hurricane Florence came to life and hit the southeastern United States. It is not what President Trump has done over the course of seventeen months that have caused economic growth never seen before in our country, it was Obama. Even good ole' Barack had the nerve to take credit for the significant upturn in our economy. Does he realize that while he was in office he ran the economy into the ground? When he says that the "job numbers" now are the same as they were in 2015 and 2016, only means he is still lying to himself and the American people. Perhaps we should remind Obama and the liberal left of facts. Now facts are very hard for a true socialist democrat to understand, however there are plenty of southern democrats that can still comprehend truth. President Obama's economy set many records; it's just not the records any country wants to set. He had the lowest labor participation rate since 1907; almost 95 million Americans were out of the labor force, worst recovery since 1940's, lowest home ownership rate in 51 years, almost 13 million more Americans on food stamps and over 43 million living in poverty, 1 in 5 families without someone in the workforce, 1 in 6 men ages 18 to 43 were either incarcerated or out of the labor force and "he" created more national debt than all other Presidents combined. Those my friends are the cold hard facts about the Obama legacy. Don't be fooled by the "Fake News".

The fake news has gotten so bad that the national weather reporters have jumped in head first with their version of fake news. There have been several pictures and video clips surfacing on social media of weather reporters staging dramatic reporting of Hurricane Florence. One clip shows a reporter acting as if the wind was so strong at his location that he could barely stand up, while in the background was two young men walking along the sidewalk with no problem what so ever. There also was a set of pictures that showed a reporter standing in water above his waist; it was because he was standing in a ditch while his photographer was standing in a few inches of water on the street. It's just hard to believe anything that comes from the national and more and more even the local news media.

And to top it off, how terrible President Trump's choice of Brett Kavanaugh to the Supreme Court is coming to light. One glorious Democrat Congress person says that the name Brett is just not a good name for a Justice. Worse than that though, a woman has contacted California Senator Dianne Feinstein and told her that Kavanaugh may have tried to rape her. They were both at a party during their "high school" years and she says Brett pulled her into a bedroom and tried to take her clothes off and covered her mouth when she attempted to scream. Really? High School Years? Yes, they are that desperate to derail anything our President does. I just pray for President Trump to keep on keeping on! He is doing just what I hired him to do.

As always that's just my opinion.
