

JUST MY OPINION

Roger R. West

It's always good to hear from like-minded friends. A good friend of mine wrote a post on social media and I asked him if I could place it in my column this week. He replied, "Feel free Brother, no copyright here. God Bless! The people need to wake up. Our nation is in big, big trouble." With that said the following are the words and beliefs of my friend Tim Peak.

"I routinely warn Americans to "wake up" to the dangers posed to us by our corrupt government. I would suggest every American get prepared to choose sides and stand and fight. This illegal administration is on the fast pace to usurp our Constitution and destroy our beloved Nation. Make no mistake about it, Obama, Soros, the Clintons and many others are orchestrating this whole thing. We have rampant illegal immigrants crossing our borders, child/female sex trafficking, out of control spending, attacks on the second amendment, cover ups of crimes, and the list goes on.

The Chief Scientist/former VP of Pfizer even says our government is lying to us about the vaccines and suggests a tremendous increase in renal disease (first 6 months) and even 10's of thousands of deaths in years 1-3 for those who take the COVID vaccine, and China and Russia (aided by Washington Politicians) are

collaborating to remove the dollar as the world's currency which would turn us into Weimar Germany in the 1930's. Of course, all of this is under media blackout, we can't share this on social media and the average American has no idea.

The time is near and getting shorter for Americans to prepare. This administration knows they only have two years and at the pace they are moving, our Nation is in peril. If you can't see this right in front of your eyes, I am at a loss. PREPARE, as this is going to get far worse in the not too distant future!"

The fight is Now! We cannot allow this tyrannical government to take our country from us. To prove my point on tyrannical, when a sitting President makes a bold statement saying there is no Amendment to the United States Constitution that is absolute, that should tell everyone that we are in danger. Once an amendment is ratified it becomes an absolute part of the Constitution. These liberal socialists (Democrats) hold no regard for our Republic and are now brazen enough to openly state so. People, please wake up!

I totally agree with Tim and the millions of true American patriots.

As always...that's just my opinion!
