

JUST MY OPINION

Roger R. West

Let me just go ahead and make some people mad... Trump was right about everything! None of his claims have been proven wrong even though millions of our tax dollars were spent trying to prove him in the wrong.

You may wonder why I am again bringing up President Donald Trump. Well, like it or not he is the duly elected President of the United States of America that has had his win in 2020 negated by a corrupt Democratic/ Communist coup. I can hear the leftist screaming about me being a conspiracy theorist. Well, no I'm not, but those screaming probably are. The real conspiracy theorists believe that the Government cares about them; the mainstream media would never mislead or lie to them and the pharmaceutical industry that makes billions off sickness wants to cure them. They don't believe they have been lied to and brainwashed because...they have been lied to and brainwashed. But I digress, the reason I am right in my thoughts has now been proven. Yep, Trump was right about voter fraud, perhaps even on a greater scale than he even imagined.

If you have not heard of the documentary just released by Dinish D'Souza called "2000 Mules," it is imperative that you either stream it or purchase the DVD. Through the group "True The Vote", a massive technological tracking system was initiated days prior to the 2020 election. As the prelude to the documentary states, "2000 Mules tells the never-before-told story of what really happened in the 2020 election."

"Forget everything you know or think you know about election fraud. 2000 Mules exposes a massive network of coordinated fraud across all five of the states that decided the election. This fraud was more than sufficient to change the outcome. This film uses two types of evidence. The first is geo-tracking which monitors the cell phone movements of mules or paid criminal traffickers delivering illegal ballots to mail-in drop boxes. It's a new technology used for the first time to bust a very old type of fraud. The second is video evidence obtained from the official surveillance cameras installed by the states themselves. The film takes you to the scene of the crime, again and again and again. You can actually watch the criminals at work. Finally, the film decisively answers the most important question; who really won the 2020 election. This is a movie that documents the biggest heist in American history. Its goals are to reveal how it happened, who did it and how to make sure that this never happens again."

This film should erase any doubt in even the most skeptical. You owe it to yourself and to America to view the indisputable truths. We as Americans need to join forces to ensure a widespread investigation which will result in thousands of arrests and correct treasonous occurrences to our sacred election system. Without fair and honest elections, we have no Democracy.

As always...that's just my opinion!
