

THE **BOUNDARIES** LONGITUDINAL STUDY

As a physician or future physician, would you like to share your thoughts, perceptions, and responses regarding the proposed legislation on reporting undocumented patients seeking care?

Participants are sought for a study investigating what it would mean for physicians and their daily work if they are made responsible for reporting patients without legal permission to stay in the country to the police or migration authorities.

Follow the link www.boundaries.study or scan the QR-code for further information.
