

SANTA GERTRUDIS & STAR5 FEMALES
NOVEMBER 21, 2020 | ROBSTOWN, TEXAS

SOUTH TEXAS HERITAGE SALE

An Opportunity to Build your Herd with Functional Santa Gertrudis and Star5 Females

As we approach the back end of 2020, I can't help but reflect on the many challenges we have faced as a human race, and as cattlemen striving to produce, market and sell our product in these historic, trying times. From the Houston Livestock Show to today, so much has changed. I use the Houston show as a reference because we can all remember where we were and what we were doing when the show decided to close its doors for 2020, changing everything we know as "normal".

Through it all, however, we have continued to work diligently as producers in our industry. Cattle people don't quit. It is our job to persevere and roll with the changes. I am proud to stand with you and call you all my colleagues and friends. The 2020 South Texas Heritage Sale will continue to grow and bring you some of the best genetics from around the country. We have made a few subtle changes to our sale in light of the current situation but nevertheless, the sale is definitely on course with a terrific set of cattle coming.

As always, our consignors are bringing their very best, offering cattle from as far as North Carolina, New Mexico, and Colorado. We are extremely excited with this year's lineup of functional, quality Santa Gertrudis and Star 5 Santa Gertrudis females. Like last year, we will be selling via video with the cattle on the property, available for viewing and hauling. If you have chosen not to travel to us this year, you can still participate online through www.DVAuction.com on sale day.

This year's sale is sizing up to be a most memorable one. Everyone involved has been working very hard, from taking consignments to data collection, photographs, videos, and advertising. All have done their part and I am grateful for all the hard work. Melanie Brewer, our Sale Secretary has worked tirelessly to get all the consignments in order. She's fired off emails and text messages, keeping all of us on our toes, making sure nothing is forgotten. Melanie, a big, hearty THANK YOU for all your hard work.

The Sale Committee has also included two new committee members, Mr. Scott Reese from Reese Ranches in Encinal, Texas and Mr. John Hall, Korban Cattle, McAllen, Texas. We welcome these two gentlemen to the committee and appreciate what they bring to the table.

Lastly, I would like to extend the Sale Committee's most sincere and heartfelt condolences for those in our Santa Gertrudis family who have passed as a result of this terrible pandemic. We continue to pray for those families, and we stand with you in Christ's name. God Bless.

Sincerely,

The South Texas Heritage Sale Committee

Larry Garza, Kathryn Hefte, Kade Thigpen, Yancey Strait, Adolfo Sanchez, Felix Serna, Taylor Schuster, Kenneth Tom Hefte, Scott Reese, John Hall, and Melanie Brewer Friday, November 20th

4pm – View cattle

Saturday, November 21st

8am – View cattle, coffee and doughnuts 11am – Traditional Mexican Lunch Noon – South Texas Heritage Sale Cattle can be loaded out following the sale 4pm - Hot Gert Open Show

Sunday, November 22nd

9am – STJSGA Annual Hot Gert Show Noon – Sale cattle must be off fairgrounds

Data Definitions

SGBI Expected Progeny Differences

Expected Progeny Differences, EPDs, are the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the SGBI database. EPDs are expressed in units of measure (plus or minus) for each trait being evaluated and are calculated utilizing pedigree and performance information. SGBI is a leader in the adoption and implementation of cutting-edge genetic technology. In 2013, SGBI released the first genomic-enhanced expected progeny differences (DNA verified) for Bos indicus-influenced cattle. The inclusion of DNA into the breed's EPD calculations (GE-EPDs) has resulted in information that is more accurate and predicable than a pedigree and performance prediction alone. Currently, the association's database contains more than 8,000 performance verifying DNA samples. In addition, to being the first Bos indicus-influenced breed to offer GE-EPDs, SGBI was the first beef breed to implement single-step methodology for the incorporation of genetic information into the genetic evaluation. This approach maximizes use of data reported on all animals throughout the pedigree and greatly improves the EPD accuracy.

SGBI Indices

Due to the amount of performance data submitted over the last 5- year period, the SGBI Board of Directors approved a recalibration of the breed's genetic evaluation and the development of new selection indices to replace the association's original selection indices. The Performance Committee ratified the recalibration and indices last month and the January EPD download utilizes the updated configuration. As expected, there was some movement, however, the recalibrated information presents a more accurate picture of an animal's genetic merit.

SGBI Balanced Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. It further assumes that producers are either 1) marketing carcasses on the grid or 2) that buyers of their feeder calves base pricing on feedlot and carcass performance.

SGBI Cow/Calf Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. However, it assumes all calves are marketed at weaning or soon thereafter. It further assumes that feeder calf buyers don't base decisions on feedlot or carcass performance, making these traits less relevant to profitability.

SGBI Terminal Index: This index assumes that producers are not keeping replacement heifers from the bulls they purchase. It assumes that producers are marketing carcasses on the grid, making carcass traits relevant to their business.

Selection indices will be reported as a percentile ranking (top 1% - bottom 99%) and will replace \$ Growth and Carcass Rank, on pedigrees.

Terms and Conditions

Terms: The terms of the sale are cash or check, payable at sale location.

Herd Health: If not from accredited herds, heifers will have brucellosis vaccination or clean test.

Purchaser's Risk: Each animal becomes the risk of the purchaser as sold. Animals will be care for at the purchaser's risk for reasonable length of time.

Breeder's Guarantee: No guarantee is given that a pregnant female will deliver a live calf or that she will carry a calf full term. Bulls sell with satisfactory semen test within 30 days of sale.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, Auctioneer nor seller assumes any responsibility in this manner and disclaims any liability, legal or otherwise in the event of accident or loss of property.

Liability: The Sales Management and/ or Auctioneer has been employed by the consignors of the animals being sold solely for the purpose of advertising and conducting the subject sale. All information regarding the subject animals as published in the sale brochure and as announced in the sale is based on representation made to the Sales/ Management/Auctioneer have not made any independent investigation to verify the title, health, registration and lien status of the subject animals; and the Sales Management and/or Auctioneer make no representations, either expressed or implied, as to whether or not the subject animals are security under any lien, with legal equitable.

Announcements: Announcements from the auction block will take precedence over the printed material in this catalog. Buyers are therefore cautioned to pay attention to any such announcements.

DONATION LOT

A year ago on the day of this very sale, Double G Farms lost its patriarch and father, Gilbert Garza. It was at this sale that our good friend and someone we consider family, Mr. Victor Guerra, created the Gilbert Garza Memorial Scholarship. Mr. Guerra has been a ring man for the South Texas Heritage Sale for some years now. He graciously donated his fee for his duties that day plus another \$100.00 to create this honor for our daddy. Victor, we thank you for your generosity and love for our youth in agriculture. Building on Victor's gesture, Double G Farms has committed one consignment per year in support of the Gilbert Garza Memorial Scholarship. This year we bring Miss Dbl. G 984, an LJV 6/165 daughter, going back to SR 710. She's out of Miss Dbl. G 784, an SJ Conductor daughter, out of Olivarez 0/384. She sells bred to SR 92/4 who goes back to Urbanosky's Bulletproof 4/30 on the top. All proceeds from this sale will support the Gilbert Garza Memorial Scholarship, awarded to an eligible South Texas Jr. Santa Gertrudis Association high school senior.

Always in our hearts....

ilbert Garza

Urbanosky's Ulta was a donated heifer that Kalli Kimble received last year. As a senior this year, she wanted to pay it forward by having all proceeds go to the 2021 National Junior Heifer Show and the South Texas Junior Association 50/50. This heifer is halter broken and is bred to Hefte Ranch F19 Pure Swagger.

Reg: 20195126

Red Doc 9103 is an outstanding female sired by Red Doc Checkmate 7069. This heifer has an actual REA of 11.66, which is in the top 1% for EPDs. She is bred to Red Doc Trump's Acquittal 8511 (#20188214) and is due to calve January 2021. Red Doc 9098 is an easy fleshing heifer, with curve bending birth weight of 65 lb. and wean weight of 626 lb. Red Doc 9098 offers a chance to purchase high marbling genetics. She sells bred to 7MB2 (#20176512), due to calve March 2021. Red Doc 9078 brings the opportunity to own an amazing curve bender. She ranks in the top 1% for both marbling and backfat EPDs, with actual IMF of 6.00 and Backfat of 0.19. Red Doc 9078 is bred to Red Doc ET Lumbre 8509 (#20188237), due to calve between January 2021 and April 2021. Red Doc 9014 offers another opportunity at well balanced, quality genetics. She is in the top 5% in all three indices, Balanced, Cow/Calf, and Terminal. She sells bred to Red Doc ET Lumbre 8509 (#20188237), due to calve between January 2021 and April 2021.

Korban Cattle 115's impressive phenotype is sure to stand out! Sired by KR 1269/14 GALAN, and one of our go to cows Schuster 600/1 purchased here at Heritage sale in 2017. Korban Cattle 115 boasts on 5 traits in the top 20% with an IMF of 547, REA of 11.29 & 996 lb at 12 months of age. Let Korban Cattle 115 bring this unique package to your breeding program. For Korban Cattle 115 we wanted to use something special to get her bred, so we Al'd her to one of the limited KR651/18 Chosen One straws bought for \$600.00 a straw at the fit Star sale in 2019. After Al we covered her with KR 395/18 Tirfecta, another exciting young herd sire. Korban Cattle 115, sire day kR 1269/14 GALAN, and out of one of the cows that got us started, Double G 625. Korban Cattle hasn't looked back, selecting only the best, and this heifer is no exception. Korban Cattle 117's phenotype as well as her disposition will surely put you in a good spot. She sell's Al'd to 8 rown Oracle B112, one of the highest indexing bulls in the Red Angus breed, and backed up to KR 395/18 Tiffecta. Combined with her sire, KR 1269/14 GALAN, Korban Cattle 117 is sure to produce a powerhouse American Red calf.

Double G Farms purchased this female's sire, Red Doc 6069 at the 2017 Red Hot Bull sale for one reason, to help create the kind of cattle that will improve a herd. When we combined him with Schuster's 701/1, we were able to create something we feel is really special. In our opinion, Miss Dbl.G 907 combines carcass with phenotype, doing extremely well in the show-ring, as well as a REA of 12.7 and IMF of 4.9. She sells bred to LJV 6/165 a paternal brother to the great LJV Mason, owned by Strait Ranches. LJV 6/165 bridges the gap, combining genetics from SR 710 and Mr. Winrock N127, while her dam brings AJH 126/0 to the equation. Miss Dbl. G 907 is halter broke and still show eligible.

If you are looking for balanced EPD's and great phenotype Korban Cattle 202 is the female you are looking for! Korban Cattle 202 is sired by SR Genesis 75/3, and out of Hefte Ranch F35 who goes back to our Hefte Ranch KT 600, bought at the Houston Super Sale in 2018 for \$11,000.00. We are very proud of the potential of this young female. With 8 traits in the top 20% & 6 traits in the top 10%, to include her MARB in the top 1% and her REA in the top 2%, what more could you ask for? Korban Cattle 202 also has the phenotype potential to go down the road and win you some belt buckles. Korban Cattle 206's beautiful phenotype has caught the attention of customers who came to the ranch, and who have asked for a private treaty deal, but we wanted the save this great heifer for this sale. Korban Cattle 206 is not only a front pasture cow, she carries the genetics any cowman/cowwoman would be proud to have with 7 traits in the top 20%, including 5 traits in the top 10%. She's sired by KR729/16, one of the most balanced bulls in the breed. Her dam SR 79/18 was purchased at the 2018 Tried & True production sale. Korban Cattle sells this heifer with confidence that she will be a profitable investment for your program.

Korban Cattle 208 is a full sib to Korban Cattle 109, who sold for \$6,000.00 at the 2019 South Texas Heritages Sale to Strait Ranches who hauled her to numerous stock shows with great success. This mating proves the phenotypical show calf produced by this great sire, KR 1269/14 GALAN. Her dam, Olivares 5/566 has been a great mating when combined with this sire. Korban Cattle is confident this particular mating will bring great phenotype and genetics to your herd! A great heifer calf offered, sired by KR 1269/14 GALAN, and out of Schuster 622/1 purchased at the 2017 South Texas Heritage Sale. GALAN when combined with South Texas genetics puts together the phenotype to make this heifer competitive in the show ring, not to mention what she will do in the pasture as a cow. Korban Cattle 210 sells surgically dehorned.

Heifer is sired by KR 621/15, a son of KR 191/13 that has done so much for Hefte Ranch. Her dam, a 4J A team cow, calved at 23 months and has weaned a calf every year since. Here is a chance to own a heifer out of Four J's premier marbling bull - Top 1% marbling and Top 5% REA. Heifer's marbling is Top 2%. Her dam is a John Liford female's second calf. Here is a chance to own a heifer out of Four J's premier marbling bull - Top 1% marbling and Top 5% REA. Heifer's marbling is Top 2%. Her dam is Briggs 175/14 another of our consistent producers.

Lola is out of Lyka 030, a show calf of Bayli's from 2010. This heifer has Wendt and Harris genetics from our herd sire Estaban 213/0 and CB Grizzly's Chunk 0525 and Carroll genetics on the dam side. She sells at 14 months of age and ready to breed to the bull of your choice. Carla combines Wendt, Harris, and Carroll breeding. Her dam is a CB Grizzly's Chunk granddaughter. This low birth weight calf (63 lb) weaned at an adjusted weight of 508 under tough conditions. Malibu is out of a Rocking A show heifer of Sage's and our Wendt son, Estaban 213/0. She combines Rocking A, Harris, Wendt, and Briggs genetics and had an adjusted weaning weight of 543 lb.

LJV 9/213 is a polled daughter of our senior herd sire SR 94/3 and granddaughter of RDF Never Before 1136. On the bottom side of the pedigree her dam is a daughter of SR 710, the sire of LIV Mason 0/72. 9/213 has seven traits in the top 10%, including top 1% HCW, top 3% YW, and top 5% Marb. LJV 9/215 is a polled daughter of SR 710 and a paternal sibling to LJV Mason. On the dam's side of the pedigree are PCR Avalanche 95/5 and Wendt All Star 5876. She has seven traits in the top 10%, including top 1% HCN and REA, top 2% Marb, and top 3% YW.

Letting go is hard to do...Korban Cattle 114 is surely one of our keepers. Sired By RDF Never Sank 5012, and out of KT 716, purchased at the 2017 Heritage Sale. Korban Cattle 114 scanned an incredible 7.12 IMF and 10.62 REA bringing 5 of her traits in the top 20%. Korban Cattle 114's half sister set a sale record at the 2019 Heritage Sale, as a 9-month-old heifer without scan to Wiley Ranch for \$7,000.00. You will surely be satisfied with Korban Cattle 114's proven phenotype, and carcass traits! You can't get any more docile than Korban Cattle 114. She sell's bred to KR 395/18 Trifecta.

Exceptional three-quarter blood Star Five female, Ms. Rattle M 969, is a June 2019 female with great conformation and structurally correct on her feet and legs. This female has a great disposition combined with style, capacity and thickness, definitely a money maker that will work in a purebred grading up or a commercial operation. Al'd to Harris Farms T049/4, September 1, 2020, calf will be able for purebred registration if meets Standard of Excellence guidelines.

Check out this Star 5/ American Red! This feminine, deep bodied, moderate frame female will work in anyone's herd. Fancy's dam "Miss Fiat" was purchased in the Great Santa Gertrudis sale back in 2018, for her eye appeal and even better genetics. Her sire (R.A Brown PCH Hard Drive) has produced numerous heifers, that we currently have as replacement females that are outstanding milkers! Fancy is halter broke, gentle, and is ready for any junior exhibitor to take her to the winner's circle. You do not want to let this one pass you by!!
