SOUTH TEXAS HERITAGE SALE

An Opportunity to Build your Herd with Functional Santa Gertrudis and Star5 Females

Rebuild, renew, re-establish. It seems one of our Santa Gertrudis friends is doing one of these, these days. For the past year (and it seems like a lifetime) we or someone we know is having to make minor or major adjustments to their cattle operation. Drought, too much rain, or a loss of a family member has prompted all of us to make changes, partially disrupting our normal day-to-day cattle management activities. It's been tough on us all but in true "Gert Grit" fashion, we are all managing to persevere and continue. Our prayers and well wishes to our entire Gert family.

This year's South Texas Heritage Sale is no different. The sale also manages to go on, bringing you the best set of Santa Gertrudis and Star5 Santa Gertrudis females in our region. Our committee has worked very hard and we are firing on all 8 cylinders. Thank you all for your commitment and help. Hefte Ranches, Briggs Ranches and Schuster Farms opened their gates to the consignors for filming and photos. San Jose Cattle Company is so graciously donating the delicious meal to be served on sale day. Carne guisada, rice, beans and pan de campo will be served, and as always, it will be delicious. All committee members have done their part. A very special THANK YOU to Kade Thigpen and Melanie Brewer, our sale Secretary, for organizing the entries and sale order, which is quite a job and very stressful. We appreciate everyone's hard work.

Finally, our hearts, thoughts, and prayers go out to our friends and family members lost this past year. We are so heartbroken by our losses but they would all want us to carry on and represent our breed and our brands. In the words of a dear friend of mine, Carlos X. Guerra, ANIMO!!!

Thank you,

Larry Garza

Data Definitions

SGBI Expected Progeny Differences

Expected Progeny Differences, EPDs, are the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the SGBI database. EPDs are expressed in units of measure (plus or minus) for each trait being evaluated and are calculated utilizing pedigree and performance information. SGBI is a leader in the adoption and implementation of cutting-edge genetic technology. In 2013, SGBI released the first genomic-enhanced expected progeny differences (DNA verified) for *Bos indicus*-influenced cattle. The inclusion of DNA into the breed's EPD calculations (GE-EPDs) has resulted in information that is more accurate and predicable than a pedigree and performance prediction alone. Currently, the association's database contains more than 8,000 performance verifying DNA samples. In addition, to being the first *Bos indicus*-influenced breed to offer GE-EPDs, SGBI was the first beef breed to implement single-step methodology for the incorporation of genetic information into the genetic evaluation. This approach maximizes use of data reported on all animals throughout the pedigree and greatly improves the EPD accuracy.

SGBI Indices

Due to the amount of performance data submitted over the last 5- year period, the SGBI Board of Directors approved a recalibration of the breed's genetic evaluation and the development of new selection indices to replace the association's original selection indices. The Performance Committee ratified the recalibration and indices last month and the January EPD download utilizes the updated configuration. As expected, there was some movement, however, the recalibrated information presents a more accurate picture of an animal's genetic merit.

SGBI Balanced Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. It further assumes that producers are either 1) marketing carcasses on the grid or 2) that buyers of their feeder calves base pricing on feedlot and carcass performance.

SGBI Cow/Calf Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. However, it assumes all calves are marketed at weaning or soon thereafter. It further assumes that feeder calf buyers don't base decisions on feedlot or carcass performance, making these traits less relevant to profitability.

SGBI Terminal Index: This index assumes that producers are not keeping replacement heifers from the bulls they purchase. It assumes that producers are marketing carcasses on the grid, making carcass traits relevant to their business.

Selection indices will be reported as a percentile ranking (top 1% - bottom 99%) and will replace \$ Growth and Carcass Rank, on pedigrees.

Terms and Conditions

Terms: The terms of the sale are cash or check, payable at sale location.

Herd Health: If not from accredited herds, heifers will have brucellosis vaccination or clean test.

Purchaser's Risk: Each animal becomes the risk of the purchaser as sold. Animals will be care for at the purchaser's risk for reasonable length of time.

Breeder's Guarantee: No guarantee is given that a pregnant female will deliver a live calf or that she will carry a calf full term. Bulls sell with satisfactory semen test within 30 days of sale.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, Auctioneer nor seller assumes any responsibility in this manner and disclaims any liability, legal or otherwise in the event of accident or loss of property.

Liability: The Sales Management and/or Auctioneer has been employed by the consignors of the animals being sold solely for the purpose of advertising and conducting the subject sale. All information regarding the subject animals as published in the sale brochure and as announced in the sale is based on representation made to the Sales/Management/Auctioneer have not made any independent investigation to verify the title, health, registration and lien status of the subject animals; and the Sales Management and/or Auctioneer make no representations, either expressed or implied, as to whether or not the subject animals are security under any lien, with legal equitable.

Announcements: Announcements from the auction block will take precedence over the printed material in this catalog. Buyers are therefore cautioned to pay attention to any such announcements.

31/20 is a Chosen One 651/18 x 54/18 ET bred heifer. Look at the depth this female carries in such a beautifully moderate frame. She also scanned very well with a 1.31 re/cwt and 5.39IMF. She sells bred to Schuster Farms 20/9(20195434) an outstanding young herd sire who has a very bright future. 49/20 is a Catalyst daughter. She comes from the SR 837 bloodline which has done so much for Strait Ranches. She has also been exposed to the future all star of the breed in 5369G8. 5/20 is an ET calf out of the famous 915C5 and one of most proven bulls in the Santa Gertrudis breed KR EL REY (921/15). She scanned very well with a 5.85 IMF and 11.12 in Ribeye or 1.17 RE/CWT. This female sells bred to LSF Futurists 9031G(20197666) who was a high selling red angus bull in LSF's 2020 spring sale. It hurts to sell these kind of females but we have a firm belief that we must be willing to sell these top end females to continue developing and building our brand.

GS: KR 191/13 GD: KR 73/13 YR			GS: RED DOC SABLE LINDO 3085 GD: RED DOC 3005						

20/358 is a really nice Four J heifer with a marbling EPD in the top 4%. Her grand sire is King Ranch 191/13. Her dam is an 11 year old who consistently produces "keepers" for us. Her 2018 bull made us proud at the 2021 Bluebonnet Classic. 20/395 is another granddaughter out of King Ranch 191/13. Her dam is a six year old on our A team with a 369 day calving interval and has produced four calves (#5 is on the way). We have retained three of them. Both are bred for fall calf to one of two to Four J sires. Four J will pay for sire trace on calf.

This is another ET female that we are offering out of Strait Ranches 54/18, a very prolific Catalyst daughter that we purchased at the first Tried and True sale and she has already produced over \$50,000 in progeny out of her first flush season. This KR El Rey 921/15 x 54/18 mating worked incredibly well and we believe this female has a very bright future. This female also sells exposed to a young bull the Santa Gertrudis breed is starting to hear about, Jackpot 5369G8 who has some of the most ridiculous EPDs in our entire database. He is by far and away the number 1 ranked bull for marbling in our database and has an exceptional phenotype. DO NOT LET THIS OPPORTUNITY pass you by as semen packages are closed in the United States.

Here's a great female with femininity and muscle! She combines three-time state champion SJ Patton with Wavemaker. Bred to our Harris bred son, Harris 190E 253G42 "Dos Equis".

The South Texas Heritage Santa Gertrudis Association
and the South Texas Junior Santa Gertrudis Association
would like to thank
San Jose Cattle Company
for generously donating Saturday's lunch.

A. KORBAN CATTLE 238

Korbán 238 is one of the top females we have had the pleasure of offering to date. She combines genetics from KR Chosen One, RDF 3162, and KR921/15 El Rey. Korbán 238 10 EPD's in the top 20%, with a scan result of 5.26 IMF, and 10.42 REA, exemplifies what we are working to produce, combining true carcass with functional phenotype.

Korbán Cattle is retaining the right to one IVF Procedure guaranteeing 6 viable embryos at our expense.

B. KORBAN CATTLE 249

Korbán 249 is a unique AI daughter of our KR480/16 donor purchased at the 2019 Mid-coast super sale for \$22,000.00, and sired by the proven SR Genesis 75/3. Korbán 249 poses 9 traits in the top 20%, with these balanced EPD's set she should complement any bull you bred her to.

C. KORBAN CATTLE 251

Korbán 251 is a unique outcross mating. Her dam RDF 8061 has been a donor in our program since we bought her at the 2019 Red Doc sale, and Her sire Hefte Ranch F72 Selecto out of proven Harco 1323, and the prolific Hefte Ranch A43 Donor!. This mating combines highly proven, and sought after genetics from both Red Doc farms, and Hefte Ranch. If you are needing a outcross female, look no further.

D. KORBAN CATTLE 213

Korbán 213 is our definition of a complete female. Her dam is an exceptional Schuster farms donor cow that has consistently produced top end females. Her sire KR1269 Galan makes moderate, fertile females with beautiful udders.

Korbán 213's sisters have been bought at previous Heritage sales by Strait Ranches & Wiley Ranch.

We have no doubt this heifer will be a donor for any program in the coming years.

E. KORBAN CATTLE 214

Korbán 214 is a combination of true South Texas Heritage genetics that have produced some of our best phenotype traits. Korbán 214 combines KR97/10, 5 Oaks, and proven genetics from one the original heritage breeders Olivarez Ranches. These genetics have been tested in south texas since the conception of the breed, so buy with confidence.

F. KORBAN CATTLE 250

Korbán 250's dam was purchased in the 2017 South Texas Heritage sale from Double G farms. Double G 625 Ramona will never leave Korbán Cattle, she is a very special cow to us as we believe Korbán 250 will be for you. This pretty, feminine heifer is a great outcross for high EPD growth and carcass bulls.

24

KORBAN CATTLE A 238

Reg: 20202614 (P) 9/29/2020

\$

Fertility, performance, feed efficiency, growth and top EPD's in feminine moderate frame score animals, are what you will find in our 2021 South Texas Heritage Sale consignment's. The beginning of our herd goes back to the 2017 South Texas Heritage Sale. This brings extra appreciation for this sale, motivating us to offer one of our best offerings to date, with the exceptional combination of proven genetics in the breed that bring the potential of herd changing results.

KT 1/21 is a heifer I wish I could take credit for, but Briggs Ranches gets the glory for this one. I bought her dam, Briggs 6676F5, out of the first Quail Valley Elite sale in 2020. KT 1/21 has an incredibly proven pedigree, tying in Red Doc 3150, RA Brown, Briggs, and Harris Farms. Her EPD set is very balanced and her disposition is exceptional. For those who like to dig deeper, KT 1/21's dam had a great udder and bred back first exposure. We are excited and blessed to be able to offer this heifer.

GS: KR 1130/13 GD: RED DOC 2119'			GS: HF FRED 303/9 GD: HARDING 149/7					

5J's 04/20 is out of Red Doc Roughneck and Creech Farms' infamous Ariel cow. 04/20 has stacked genetics and is a mainstream outcross to the modern performance bulls. 5J's has had great success with a maternal half brother to 04/20, and we are sure this female carries the same proven qualities.

Eye catching, unique, powerful are a few ways to describe KT 3/21. I love red motts because they make outstanding cows in any program. If you wanted to buy a pretty one for your significant other, this one would work. If not, just put her in your front pasture and make all of your neighbors jealous.

Sissy will work in anyone's herd, show ring, replacement female or even would make a great recip cow. Her dam is a Braunvieh/Beefmaster/Red Angus cross cow. Talk about a milker!! Dam is also a half sib to Lazy L's Fancy, that sold in the South Texas Heritage sale last year. Sissy's sire "Top Shelf Jameson" is a son of the great Myers 14/10 "Corona", who was high point female 2015-2016, along with being the dam of the 2020 Grand Champion Jr National female. We are impressed with his offspring thus far. She is halter broke and ready to go!
