SOUTH TEXAS
HERITAGE SALE

NOV 18, 2023 | ROBSTOWN, TX

Richard Borchard Fairgrounds
Selling 60+ Registered and Commercial Santa Gertrudis & Star5 Females

SOUTH TEXAS HERITAGE SALE

An Opportunity to Build your Herd with Functional Santa Gertrudis and Star5 Females

Another year

of working hard, praying for rain, and sacrificing to have the opportunity to raise the best breed of cattle in the world, Santa Gertrudis. Every year we all strive to breed better than the year before, to make that animal we can all be proud of and sell with confidence. This year sure had its challenges due to the lack of rain but with rising calf prices we are still holding on and praying for rain.

The South Texas Heritage Sale Committee works hard to make this sale happen year after year. If you see them give them a big thank you because without them there is no sale. We have put together a great set of purebred and Star 5 Santa Gertrudis females to select from this year. I would also like to thank all consignors for working hard year after year to bring top quality females to the sale. Let's pray for another great sale and a big thank you to all buyers in advance for coming back year after year.

Welcome to the 2023 South Texas Heritage sale.

Location & Schedule

Friday, November 17th
4pm – View cattle

Saturday, November 18th

8am – View cattle, coffee and doughnuts
11am – Traditional Mexican Lunch
Noon – South Texas Heritage Sale
Cattle can be loaded out following the sale
4pm - Hot Gert Open Show

Sunday, November 19th

9am – STJSGA Annual Hot Gert Show
Noon – Sale cattle must be off fairgrounds

Special thanks to auctioneer:
Leo Casas, III

Data Definitions

SGBI Expected Progeny Differences

Expected Progeny Differences, EPDs, are the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the SGBI database. EPDs are expressed in units of measure (plus or minus) for each trait being evaluated and are calculated utilizing pedigree and performance information. SGBI is a leader in the adoption and implementation of cutting-edge genetic technology. In 2013, SGBI released the first genomic-enhanced expected progeny differences (DNA verified) for Bos indicus-influenced cattle. The inclusion of DNA into the breed's EPD calculations (GE-EPDs) has resulted in information that is more accurate and predicable than a pedigree and performance prediction alone. Currently, the association's database contains more than 8,000 performance verifying DNA samples. In addition, to being the first Bos indicus-influenced breed to offer GE-EPDs, SGBI was the first beef breed to implement single-step methodology for the incorporation of genetic information into the genetic evaluation. This approach maximizes use of data reported on all animals throughout the pedigree and greatly improves the EPD accuracy.

SGBI Indices

Due to the amount of performance data submitted over the last 5- year period, the SGBI Board of Directors approved a recalibration of the breed's genetic evaluation and the development of new selection indices to replace the association's original selection indices. The Performance Committee ratified the recalibration and indices in 2021. As expected, there was some movement, however, the recalibrated information presents a more accurate picture of an animal's genetic merit.

SGBI Balanced Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. It further assumes that producers are either 1) marketing carcasses on the grid or 2) that buyers of their feeder calves base pricing on feedlot and carcass performance.

SGBI Cow/Calf Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. However, it assumes all calves are marketed at weaning or soon thereafter. It further assumes that feeder calf buyers don't base decisions on feedlot or carcass performance, making these traits less relevant to profitability.

SGBI Terminal Index: This index assumes that producers are not keeping replacement heifers from the bulls they purchase. It assumes that producers are marketing carcasses on the grid, making carcass traits relevant to their business.

Selection indices will be reported as a percentile ranking (top 1% - bottom 99%) and will replace \$ Growth and Carcass Rank, on pedigrees.

Terms and Conditions

Terms: The terms of the sale are cash or check, payable at sale location.

Herd Health: If not from accredited herds, heifers will have brucellosis vaccination or clean test.

Purchaser's Risk: Each animal becomes the risk of the purchaser as sold. Animals will be care for at the purchaser's risk for reasonable length of time.

Breeder's Guarantee: No guarantee is given that a pregnant female will deliver a live calf or that she will carry a calf full term. Bulls sell with satisfactory semen test within 30 days of sale.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, Auctioneer nor seller assumes any responsibility in this manner and disclaims any liability, legal or otherwise in the event of accident or loss of property.

Liability: The Sales Management and/or Auctioneer has been employed by the consignors of the animals being sold solely for the purpose of advertising and conducting the subject sale. All information regarding the subject animals as published in the sale brochure and as announced in the sale is based on representation made to the Sales/Management/Auctioneer have not made any independent investigation to verify the title, health, registration and lien status of the subject animals; and the Sales Management and/or Auctioneer make no representations, either expressed or implied, as to whether or not the subject animals are security under any lien, with legal equitable.

Announcements: Announcements from the auction block will take precedence over the printed material in this catalog. Buyers are therefore cautioned to pay attention to any such announcements.

Red Doc 0543 is sired by Red Doc En Vivo 8343, who is a world trait leader for efficiency. Her 9-year-old dam is a King Ranch sired dark red, moderate package with ideal udder and teat structure. She is bred natural service to Red Doc En Vivo 8343(20185488) due to calve late October. Red Doc 0352 is a dark cherry red female with perfect udder and fleshing ability. Her eye appeal, moderation and ease of fleshing sets her in a very unique category and will help build your program around industry market ability. She is bred natural service to Red Doc En Vivo 8343(20185488) due to calve early October.

Red Doc ET Todo 9561
 L RED DOC ET 6353
 L KR 328/15
KORBAN CATTLE 101
 L KR624/16

The mating of Red Doc Todo 9561 and Korban Cattle 101 has proven to be a home run. Todo is a Red Doc Checkmate son that scanned a whopping 8.3 IMF with a +14 inch ribeye. Korban Cattle 101 is a daughter of Heritage Sale alumni, King Ranch 624/16. L116 is a thick made, easy fleshing, free moving heifer with lots of capacity. In addition, she offers a balanced EPD profile with stellar carcass traits.

Four J has picked 2 top-of-the-line heifers for this sale. Both have the look and the numbers. 3119 is a unique genetic package that merges tremendous growth with outstanding carcass quality, while posting a Total Maternal EPD in the top 15%. 3119's Dam, Briggs 850/14, is a top producer at 4J Cattle. With 9 measured traits in the top 35% and indexes of 3-5-3, 850/14's heifer calves have performed at the highest level ratioing 104 for weaning weight, 113 for yearling weight, and 109 for REA. 3203 is a female that will get bred early and breed back quickly. Her Heifer Pregnancy EPD sits in the top 50% of the breed and her Breed Back is in the top 20%. 3203's outstanding carcass traits, including a Marbling EPD of .40, and solid growth data points to a female that will be a profitable addition to any operation. She is sired by our Harris Chosen One 45H bull who has indexes of 2-2-2.

This moderate, pretty heifer is well rooted in Hefte Ranch genetics. Her maternal grandsire "KR 1269/14 Galan" (owned by Korban cattle) produced beautiful females with perfect udders. 03/23's Sire sold in the Tried&True Sale for \$20,000 (owned by 5J's Beef and Cattle) and has proven himself to be a very consistent producer of top genetics. I have no doubt this heifer will be a great producer for any program.

This is some cutting edge stuff right here. K245 is donor 44/20's first natural calf. The only reason this female is not in our donor pen is because of the commitment we have made to raising polled cattle. This female puts phenotype and genotype type together in a beautiful package. We look forward to hearing a lot about her in the future. K244 has royal bloodlines with her maternal granddam going back to the dam of RDF Never Before and many other excellent bulls coming out of the Red Doc herd. She is a long, well-made female and will be an asset to your herd.

This pen of two young, hardy, polled heifers are both sired by Korban 105. This sire is the son of KR 921/15, "El Rey". Korban 105 has the foundational King Ranch genetics on his sire's side and desirable Hefte Ranch genetics on his dam's side. The foundational genetics show through on these two young heifers. 04/23 is a seven-month old heifer who expresses exceptional phenotype. Her dam, KT005, has Hefte Ranch genetics on her sire's side and she was an exceptional mother to this young heifer calf. 22/22's dam is Black Hills Land and Cattle 990. This dam provides West Texas quality and durability and proven genetics. 22/22 sells exposed to SR 90/5. Her breeding status will be provided on the day of the sale.

The only thing wrong with this lot is that we don't have 24 more to sell with her. Red Mott females are one of the hottest products in the cattle business right now! We all know it, we all see it. Why not own it! The opportunities are endless on this heifer, take her and make her your own. If you have ever wondered what a breed up program from a Hereford x Santa Gertrudis could turn into. This is a great example! This beautiful $\frac{3}{4}$ blood heifer could fit into any operation in any way. Making show calves, bringing in outcross genetics or simply adding a high quality female to your replacement program. Its a unique opportunity, take advantage!

Heifers so nice we make them twice! Star5 twins, Caramel 3013 and Butterscotch 3014 both can be yours November 18th. Donor Dam to these twins is arguably Passion Farm's most prolific female, Milagra 2021, who boasts a Top 2% WW, Top 2% YW, Top 2% CW, Top 1% REA and Top 1% MB. This Donor's actuals include a 205 day WW of 716 lb, a 365 day weight of 1,111 lbs, 12.5 in REA and 8.39 IMF. Caramel 3013 and Butterscotch 3014 are Sired by Rocky Creek Beefmasters Registered Herd Sire Rocky Creek 8571. Heifers were weaned on 9/6/23 combining a total wean weight of 833 lbs adjusting up to 1,051 lbs. Incredible examples of low input/high yielding genetics in the extreme Texas drought. Both heifers are halter broke and will be entered in the Red Hot Gert Show for the buyer to show, if they choose. Here is your opportunity to purchase heterosis at its finest, demonstrating power, performance, and phenotype.

Korban's K22 & K25 are the result of our American Red program. Both heifers are sired by FUTURIST 9031G, the true power house Red Angus bull sired by Brown Oracle B112. These half sisters boast of top balanced EPD's that combined with their beautiful phenotype will surely add up to bring good results to your program.

Old Agency Reserve has put an emphasis on putting together sound quality genetics to build our program off of. Every breeding decision is thought out and intentional, every mating has a purpose. These embryos we are offering are no different. We sought out the best genetics from the most proven animals in the breed in order to make a performance animal that would be second to none. We are proud to offer these embryos, and we look forward to what these calves can do in your program.

Three embryos will be sold at three times the bidding price.

Notes

South Texas Santa Gertrudis Breeders Association
176 James Road
Tivoli, TX 77990

The background of the lower half of the poster is a teal color with a pattern of small, light-colored speckles. It features a collage of several photographs of Santa Gertrudis cattle in various settings, including a close-up of a cow's head, a cow in a field, and a cow in a pen. A faint outline of the state of Texas is also visible, with some of the cow photos placed within its borders. The text 'SOUTH TEXAS HERITAGE SALE' is centered in a large, bold, serif font, flanked by decorative horizontal lines with ornate scrollwork at the ends.
