WELCOME TO THE

SOUTH TEXAS HERITAGE SALE

An Opportunity to Build your Herd with Functional Santa Gertrudis and Star5 Females

Hello Santa Gertrudis Breeders and Friends,

It is that time of year again—the leaves are changing, cooler weather is settling in, and the bulls are getting ready to go back to work. That also means the South Texas Heritage Sale has rolled around once more. Before long, we will be heading back to Gonzales, Texas, for a memorable time of fellowship, being around great cattle, and catching up with friends both old and new. On behalf of everyone involved with the South Texas Heritage Sale, we are proud and excited to bring you another outstanding set of cattle. The Santa Gertrudis breed continues to distinguish itself as one of the hardiest and most adaptable breeds in the industry, offering superior maternal traits such as fertility, calving ease, milk production, and longevity. These cattle also produce calves that perform well in the feedlot and on grass, giving cattlemen the versatility and dependability they need. Those qualities, along with the dedication of the breeders behind them, are just a few of the reasons I am proud to be involved with this exceptional breed.

This is an exciting time to be in the cattle business, as demand for sound, productive cattle remain strong. As you look through this catalog, I believe you will agree that our consignors have reached deep into their programs and selected some of their very best cattle to offer. This sale features outstanding Santa Gertrudis genetics from respected breeders who have worked hard to develop cattle that combine quality, performance, and eye appeal. Whether you are looking to strengthen an established herd, add proven genetics to your program, or begin a new herd, you will find opportunities worthy of your consideration. We are confident these cattle can go to work for a wide range of operations and make a positive impact for their new owners.

It has been a genuine pleasure working with the staff, consignors, and supporters of the South Texas Heritage Sale to bring this event together. Their commitment to the breed and to fellow cattlemen is evident throughout this offering. We sincerely appreciate your interest and support, and we look forward to welcoming you to Gonzales in November for great cattle, good conversation, and the kind of fellowship that makes this sale special.

Barry Fontenot

South Texas Santa Gertrudis Association

Our Mission

The South Texas Santa Gertrudis Association was established in 2014 to further the improvement of the breeding of Santa Gertrudis cattle, to hold sales and shows promoting Santa Gertrudis cattle and to work in every manner pertaining to the promotion and progress of the Santa Gertrudis breed.

Data Definitions

SGBI Expected Progeny Differences: Expected Progeny Differences, EPDs, are the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the SGBI database. EPDs are expressed in units of measure (plus or minus) for each trait being evaluated and are calculated utilizing pedigree and performance information. SGBI is a leader in the adoption and implementation of cutting-edge genetic technology. In 2013, SGBI released the first genomic-enhanced expected progeny differences (DNA verified) for Bos indicus-influenced cattle. The inclusion of DNA into the breed's EPD calculations (GE-EPDs) has resulted in information that is more accurate and predicable than a pedigree and performance prediction alone. Currently, the association's database contains more than 8,000 performance verifying DNA samples. In addition, to being the first Bos indicus-influenced breed to offer GE-EPDs, SGBI was the first beef breed to implement single-step methodology for the incorporation of genetic information into the genetic evaluation. This approach maximizes use of data reported on all animals throughout the pedigree and greatly improves the EPD accuracy.

SGBI Indices: Due to the amount of performance data submitted over the last 5- year period, the SGBI Board of Directors approved a recalibration of the breed's genetic evaluation and the development of new selection indices to replace the association's original selection indices. The Performance Committee ratified the recalibration and indices in 2021. As expected, there was some movement, however, the recalibrated information presents a more accurate picture of an animal's genetic merit.

SGBI Balanced Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. It further assumes that producers are either 1) marketing carcasses on the grid or 2) that buyers of their feeder calves base pricing on feedlot and carcass performance.

SGBI Cow/Calf Index: This index assumes that producers are keeping replacement heifers from the bulls they purchase. However, it assumes all calves are marketed at weaning or soon thereafter. It further assumes that feeder calf buyers don't base decisions on feedlot or carcass performance, making these traits less relevant to profitability.

SGBI Terminal Index: This index assumes that producers are not keeping replacement heifers from the bulls they purchase. It assumes that producers are marketing carcasses on the grid, making carcass traits relevant to their business.

Selection indices will be reported as a percentile ranking (top 1% - bottom 99%) and will replace $ Growth and Carcass Rank, on pedigrees.

Denotes Top 20% of Breed

Terms and Conditions

Terms: The terms of the sale are cash or check, payable at sale location.

Herd Health: If not from accredited herds, heifers will have brucellosis vaccination or clean test.

Purchaser's Risk: Each animal becomes the risk of the purchaser as sold. Animals will be care for at the purchaser's risk for reasonable length of time.

Breeder's Guarantee: No guarantee is given that a pregnant female will deliver a live calf or that she will carry a calf full term. Bulls sell with satisfactory semen test within 30 days of sale.

Accidents: Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, Auctioneer nor seller assumes any responsibility in this manner and disclaims any liability, legal or otherwise in the event of accident or loss of property.

Liability: The Sales Management and/or Auctioneer has been employed by the consignors of the animals being sold solely for the purpose of advertising and conducting the subject sale. All information regarding the subject animals as published in the sale brochure and as announced in the sale is based on representation made to the Sales/Management/Auctioneer have not made any independent investigation to verify the title, health, registration and lien status of the subject animals; and the Sales Management and/or Auctioneer make no representations, either expressed or implied, as to whether or not the subject animals are security under any lien, with legal equitable.

Announcements: Announcements from the auction block will take precedence over the printed material in this catalog. Buyers are therefore cautioned to pay attention to any such announcements.

Special thanks to auctioneer:

ROCKIN' KV ATHENA 2201
ROCKING KV LIL MISS 1501

SG Aphrodite is an extremely maternal made highly productive female. Ranking in the top 10% for MK EPD, she offers the maternal value needed to produce and raise quality calves. Her pedigree is backed by proven genetics including Rafter Y Voodoo, Shaker's Playboy, Rose Hill Eight Ball, Danricks Hotchner, and Rocking KV Malone, the 2020 NJSGS Grand Champion Bull. She is sired by Thor, the 2026 SALE Santa Gertrudis Get-of-Sire. A paternal sib to class and division winners at SALE and Cattlemen's Congress, Aphrodite combines a powerful pedigree with an impressive phenotype. She is big-centered, exceptionally deep and soggy through her middle, and extremely gentle. She has been started on the halter. Aphrodite was AI'd to 777 Honeybadger Candyman ET on August 24, 2026, adding another exciting genetic opportunity.

WR 260

Today we are offering you an opportunity to own this beautiful TN Payday heifer. Payday, official name 777 Honeybadger 17K3, is producing impressive females ready to hit the show road or add profitability to your herd. This young female is big boned, straight topped, feminine fronted, and gentle in nature. She is halter broke and very friendly. We have three boys, she is used to them all ranging in age from 4-12. Her genetics speak for themselves, the top side goes back to 777 Honeybadger 1202, Harris Riverbend Farms, Quad T farms, and Rocking A Ranch. Her dam is our Strait Ranch Ms 38/19 260/K female, out of the SR 38/19 bull and a Diablo daughter. 260/k has 6 EPDs ranking in the top 20%. We wish we had 50 more of her! Highlight this heifer as one to stop by and see for yourself.

└ Rose Hill Nadia
┌ Rocking KV Malone 1802
| ROCKIN' KV REESE'S 2104
└ MISS SG 074

SG Mystique offers the opportunity to incorporate hard-to-find, proven genetics in a modern, flashy show prospect. Her pedigree is backed by Rafter Y Voodoo, Shaker's Playboy, Rose Hill Eight Ball, Danricks Hotchner, and Rocking KV Malone, the 2020 NJSGS Grand Champion Bull. She is sired by Thor, the 2026 SALE Santa Gertrudis Get-of-Sire. A paternal sib to class and division winners at SALE and Cattlemen's Congress. She is extremely long-bodied with a feminine front end, giving her the look and balance to be a competitive show heifer while offering the added value of bringing hard-to-find older bloodlines back into a breeding program. Mystique has been started on the halter and dehorned, making her a complete package for someone looking for a competitive show prospect with valuable genetic potential.

LZDR Houston N31 is a stout, deep-bodied young herd sire prospect with plenty of muscle, capacity and the structural soundness to go straight to work. He is the son of MR WF 2033 "Mr. Wonderful" (Kevin) and combines an impressive phenotype with a useful, balanced genetic profile. This young bull carries the desired quality and maternal genetics to enhance your operation. Houston has been fertility tested and is Trich negative. He is ready to go to work in a commercial operation or step into a registered Santa Gertrudis program as a herd sire. A powerful, functional young bull built to add those qualities to any herd.

MF 650 (Millard) is a beautiful dark cherry red with clean lines. He is out of our herd sire Hefte L08 and goes back to Hefte F14 (Tomcat) on the top side and KR Chosen one and FC Pistol 28/0 on the bottom side. He brings an impressive set of EPD's with 7 in the top 25% and balanced indices of 15/15/15. He sells halter broke and puppy dog gentle. Take him to the show ring or take him home and get him ready for his first breeding season.
