AN AUTOMOTIVE-STYLE TUBULAR FRAME

It increases durability by withstanding force from any direction. This high-strength, premium frame is positioned with a lower center of gravity to improve stability while mowing.

HYDRO-GEAR ZT-3200® TRANSAXLES

They're more heavy duty and can handle higher speeds up to 8.5mph. They're also serviceable for a longer life span.

X-FACTOR® 3 DECK

Its thick, 7-gauge steel stands up to the punishment yards and their obstacles dish out. Its sloped front end lifts grass sooner to deliver a better cut and the reinforced spindle mounts protect blade operation. The large discharge opening disperses grass for a beautifully manicured lawn.
