VISITING MEXICO IN WINTERTIME

When to Travel & Why

It's no secret that Mexico is a popular holiday destination for many tourists who want to escape the cold and trade in their winter coat and boots, for a swim suit and flip flops.

But what makes Mexico a top wintertime tourist destination each year? The answer is simple, and sunny - THE WEATHER! The best time to visit Mexico is during the dry season months that run between December and April, when there is virtually no rain and the weather stays a consistent 80 degrees. The humidity is low, the days are warm, and the nights are enjoyable cool - the perfect mixture for an enjoyable getaway!

With the summer vacation crowd leaving and children returning back to school, the winter months are also the perfect time to travel to Mexico if you prefer less crowded resorts and excursions. Resorts also tend to offer holiday specials that guests can take advantage of to save money and upgrade their experience to something a little more extravagant to celebrate their holiday season.
